I object to the Narrabri Gas Project because of the chance of contamination to the Great Artesian Basin Water that is the livelihood to farmers & people alike in there daily routine of survival. NO WATER NO PEOPLE. This natural water resource has been here for well over 100 years and has supported 4 generations of my family in the farming sector.

Please continue on back side.

Please give consideration to people out here before company profits. Once this natural water resource is contaminated there is no turning back. Without this water for our stock in the last 3 years of drought we wouldn't have any stock now. Our core breeders would have been gone. Fortunately we still have them now in this better season we are having now. Please seriously consider this project, we need generations of farmers to keep coming through & keep the Australian economy thriving.
