SUN. 19-7-2020

Object to CSG Narrabri.

I am not against Project we need Project to take Aus. forward.
My concern is the CSG. With the gasfields. They should be put on Hold.
Untill there is 100% Guarantee. It will not contaminate our water
the Under ground Great Australian Bason.

If this is Damage. Our Country will be Damage. & Will cost
Aus. a lot more then the CSG. is worth. Aus. Depens on GOOD WATER.
With the Great Aus. Bason good water Aus. will keep going
when the CSG. is gone.

Aus. Ag. has Keep Aus. going all these years & for the rest
of life in Aus. Unless CSG Damage the Bason.

We will be in Big Trouble. And the Directors of CSG will be
gone with there Big money with them.

Have a look at "Queensland Country Life" Thursday
18th June 2020. Page 12. (Liability Threat for farm Land
stated The Gas Industry has been able to transfer most. If not all
of the liability & risk onto land holders.) in quote.

Over the last 3 years. I have looked at land in Qld. & Did not buy
as the liability of CSG & Insurance was not good from what I could
work out for ~~me~~ myself even after talking to the Gas Companies

Some years ago I did have shares in the Cooper Bason
But that was not CSG. I don't have the shares now.

I am not a irrigator. But Santos will Remove Billions of lit of
water from the Bason. The Pilliga Sandstone is a recharge aquifer
for the Great Australia Bason.

What WAST & How it will be treated (Solid Salt. laced
with heavy metal) Can this be fully Guarinteed no harm to Australia
Aus. has had Bad Bush Fires. What will happen
with the Burning of flames in Fire Danger times

Thank you

Yours faithfully

J. Cotter
