I strongly object to the Narrabri Gas Project for the following reasons:

1. We cannot see enough evidence that the extraction of gas in this manner, is safe for the water we so completely rely on.
2. We live within the 150km radius of the gas field waste zone where an estimated 850-000 tonnes of toxic chemicals will need to be disposed of. Santos have not given an answer to where they will be storing the waste.

Please continue on back side.

3. Over 98% of people do NOT want to live in an industrialised gas-field. \*Shouldn't that count for something, seeing as this is supposed to be a democracy that we live in? \*(In North Western NSW)
4. The value of land gas projects are on or near decrease significantly.
