Narrabri Gas Project

I support the Narrabri Gas Project as proposed by Santos, for a number of reasons.

The economic benefit to the Narrabri Shire NSW and Australia with a more reliable , cheaper and accessible supply of gas to industry and community.

Santos have indicated that they will not drill on private property without the landholders agreement and have ruled out fracking.

The area is approx 2% of the Pilliga area.

Santos have proved to be very active in the community supporting many clubs and organisations. They will contribute over \$1.3 billion to the NSW Government over the life of the project.

The chief scientist and the CSIRO through GISERA have indicated that there will be little or nor impact to ground water in the area.

Santos have proved with their pilot program that gas can be extracted safely with little or no impact on the environment.

NSW needs a reliable cheap source of gas for electricity generation to back up the huge uptake of renewable energy.

Signed

Nerida Gourley
