

## **Submission to the IPC – Narrabri Gas Project**

**From Boston Kirkby – Narrabri Shire Resident – *Nearly 100 yrs Farming***

Good afternoon,

Today I am sending this video to you of my Dad and I that we did with John Deere so that you might understand our farm and why we don't want the Narrabri Gas Project to go ahead.

The Narrabri gas project Jeopardises out ground water which our farm is totally dependent.

Our neighbours, my friends are very concerned that our future will not be as our fathers and grandfathers. Taking pride providing food for our people.

Please watch our video and say No to the Narrabri gas Project.
