**Subject:** Narabri Gas Project. OBJECTION  
**Date:** Monday, 10 August 2020 4:48:28 PM

---

Hi

I want to register my objection to this project.  
All coal seam gas mining projects are extremely polluting to the environment and especially to the water table.

There have been numerous documented "disasters" in the U S and Canada about such mining operations.

Why do some people in government not learn from others' failures and want to inflict this sort of vandalism on our country areas?  
Corporate profits and donations should not come before the rights of Australians to live in a safe and healthy environment.

It's really a simple choice between the environment and mining companies that are allowed to pollute and destroy and never made to clean up when finished.

Please do not allow this to keep happening

Thank you
