SUBMISSION: NARRABRI GAS PROJECT

Steve O'Connor
Panel Chair
Narrabri Gas Project
Independent Planning Commission

We are writing to inform you that we are opposed to Coal Seam Gas extraction.

It's our belief that safeguards taken are generally insufficient to protect the environment ie farmers, graziers, town, cities and wildlife.

This drought that's just ended we saw on our property River Gums dying, Cypress trees and other vegetation dying as well.

The water table falls we believe over huge areas of NSW ie Narrabri and Pilliga Forest.

We will experience a change for the worst through lack of underground water.

We will be having our underground water tested as we use it for stock and domestic purposes.

We will advise interested persons to do the same.
