Subject: I OBJECT to the Narrabri Gas Project but support jobs being created.
Date: Monday, 3 August 2020 12:22:10 PM

Dear Independent Planning Commission,

You can include my name and submission on your website.

This is a submission on the Narrabri Gas Project.

I object to the proposed Narrabri Gas Project due to its significant environmental, heritage, social and economic impacts.

At the end of all government websites and before government speeches, you claim to "Acknowledge and respect Aboriginal communities past, present and future". If this were true, you would "Care for Country" and never allow projects that harm soil health, water health and biodiversity health off the drawing board. I am a mum of twin daughters and am tired of the green washing from the government that claims on one hand to respect Aboriginal connections to the land and care for the environment, but then allows destructive projects like this to even be considered. The Pilliga forest, surrounding farmland and water is important to all Australians and needs to be protected. The government needs to stop pretending fracking is the "only way" to create jobs and help the economy.

The Pilliga Forest is a global biodiversity hotspot and should be immediately protected. Any remnant of pre-1788 vegetation should be out of bounds for parasitic industries like fracking. Yes, we need energy. NO - it doesn't have to come from fracking. Regenerative agriculture can help heal the land and create sustainable jobs.

Due to the above reasons I strongly object to the Narrabri Gas Project. Thank you for the opportunity to comment. I look forward to hearing from you in regards to this submission.

Yours sincerely,
Tori Quine

Dear Independent Planning Commission,

You can include my name and submission on your website.

This is a submission on the Narrabri Gas Project.

I object to the proposed Narrabri Gas Project due to its significant environmental, heritage, social and economic impacts.

If the people say NO, then NO is NO...

What is the point of democracy if you go against the will of the people. Going against the will of the people breaks the social contract...

When the social contract is broken, it removes any position of authority with the people.

When you have no position of authority with the people your mandate is revoked!

Yours sincerely,

Melanie Cuomo

Subject: I OBJECT to the Narrabri Gas Project
Date: Monday, 3 August 2020 6:24:46 PM

Dear Independent Planning Commission,

You can include my name and submission on your website.

This is a submission on the Narrabri Gas Project.

I object to the proposed Narrabri Gas Project due to its significant environmental, heritage, social and economic impacts.

I am an Australian Citizen, living in a small Outback town in WA. I believe the process of fracking for gas is not very effective for the irreparable environmental damages it causes to flora and fauna.

My objections are that the future of the Pilliga Mouse is threatened by this project due to the spread of invasive predator species, and consequent increased rates of predation; the increased fragmentation from access tracks and dispersed clearance potentially creating unfavourable microclimates, open space, and traffic disturbances. The loss of habitat is significant.

35 threatened species rely on the Pilliga for survival—including the endemic Pilliga Mouse, Squirrel Glider and Black-striped Wallaby. It also forms part of a stronghold for threatened woodland birds including the Glossy Black Cockatoo.

The project should not be approved as the Assessment Report fundamentally fails to assure there is adequate knowledge and understanding of the current status of the Pilliga Mouse or all 35 threatened fauna in the project area or of an appropriate management regime.

This project will have the potential to impact threatened fauna through direct habitat clearance, habitat fragmentation, vehicle strike and predation by pest species. This could disrupt the breeding cycle and adversely affect habitat critical to the survival of these species. There have been no baseline population surveys of the Pilliga Mouse. Thus approving this gas field would likely breach the Environmental Protection and Biodiversity Conservation (EPBC) Act.

The Pilliga is the largest temperate woodland in NSW. Santos proposes clearing nearly 1,000ha of the Pilliga, including habitat for the critically endangered Regent honeyeater and for koalas which have already lost 30% of their habitat within NSW in the Black Summer fires.

The Assessment Report concludes the project would not “adversely affect groundwater” however Australia is the driest inhabited continent on earth. We cannot afford to gamble with our water. Underground aquifers, like the Great Artesian Basin, support life across inland Australia. CSG drilling is simply not worth the risk and the studies are inadequate to thoroughly confirm there would be no adverse risk to groundwater.

Due to the above reasons I strongly object to the Narrabri Gas Project. Thank you for the opportunity to comment. I look forward to hearing from you in regards to this submission.

Dear Independent Planning Commission,

You can include my name and submission on your website.

This is a submission on the Narrabri Gas Project.

I object to the proposed Narrabri Gas Project due to its significant environmental, heritage, social and economic value.

I very recently visited The Pilliga and was struck by its beauty and importance to all of us and future generations of Australians. To me it makes no sense whatsoever to cause permanent damage to it for the sake of a fossil fuel for which there will soon be no market. And this project will deliver precious little for Australia, either in jobs or taxes.

Due to the above reasons I strongly object to the Narrabri Gas Project. Thank you for the opportunity to comment. I look forward to hearing from you in regards to this submission.

From: [Jo Rogers](#)
To: [IPCN Enquiries Mailbox](#)
Subject: I OBJECT to the Narrabri Gas Project
Date: Tuesday, 4 August 2020 9:28:00 AM

Dear Independent Planning Commission,

This is a submission on the Narrabri Gas Project.

I object to the proposed Narrabri Gas Project due to its significant environmental, heritage, social and economic impacts.

I am a concerned Australian, deeply concerned about climate change and a viable future for the biosphere and the retention of biodiversity in Australia.

Infrastructure of the Narrabri Gas Project poses a serious bushfire risk due to its highly flammable nature and the Assessment Report does not adequately account for how this risk will be managed.

The Pilliga is the largest temperate woodland in NSW. Santos proposes clearing nearly 1,000ha of the Pilliga, including habitat for the critically endangered Regent honeyeater and for koalas which have already lost 30% of their habitat within NSW in the Black Summer fires.

The forest, surrounding farmland and water is important.

The Assessment Report states “the project is unlikely to significantly impact any of the identified threatened fauna species, given the relatively small area of habitat removal and the presence of large areas of suitable habitat in the region.” However, the report does not take into account the project has the potential to impact threatened fauna through direct habitat clearance, habitat fragmentation, vehicle strike and predation by pest species. This could disrupt the breeding cycle and adversely affect habitat critical to the survival of these species. There have been no baseline population surveys of the Pilliga Mouse. Thus approving this gas field would likely breach the Environmental Protection and Biodiversity Conservation (EPBC) Act.

The future of the Pilliga Mouse is threatened by this project due to the spread of invasive predator species, and consequent increased rates of predation; the increased fragmentation from access tracks and dispersed clearance potentially creating unfavourable microclimates, open space, and traffic disturbances. The loss of habitat is significant.

Due to the above reasons I strongly object to the Narrabri Gas Project. Thank you for the opportunity to comment. I look forward to hearing from you in regards to this submission.

From: [Kathryn Davy](#)
To: [IPCN Enquiries Mailbox](#)
Subject: I OBJECT to the Narrabri Gas Project
Date: Tuesday, 4 August 2020 1:28:46 PM

Dear Independent Planning Commission,

You can include my name and submission on your website.

This is a submission on the Narrabri Gas Project.

As someone who visits and values this part of NSW and takes a special interest in the Pilliga Forest, I object to the proposed Narrabri Gas Project due to its significant environmental, economic and Aboriginal heritage impacts.

The project would inevitably degrade habitat and adversely impact local flora and fauna, specifically:

There is still no adequate plan to safely and responsibly dispose of salt waste from the project which is set to be 117 tonnes or two B-double trucks of salts waste every day, during peak production. The plan to dispose of it in nearby landfill is inadequate as no capacity evaluation of the landfill has been undertaken. Salty waste will leach from landfill and contaminate groundwater, farmlands and ecosystems.

The Assessment Report states “the project is unlikely to significantly impact any of the identified threatened fauna species, given the relatively small area of habitat removal and the presence of large areas of suitable habitat in the region.” However, the report does not take into account the project has the potential to impact threatened fauna through direct habitat clearance, habitat fragmentation, vehicle strike and predation by pest species. This could disrupt the breeding cycle and adversely affect habitat critical to the survival of these species. There have been no baseline population surveys of the Pilliga Mouse. Thus approving this gas field would likely breach the Environmental Protection and Biodiversity Conservation (EPBC) Act.

The future of the Pilliga Mouse is threatened by this project due to the spread of invasive predator species, and consequent increased rates of predation; the increased fragmentation from access tracks and dispersed clearance potentially creating unfavourable microclimates, open space, and traffic disturbances. The loss of habitat is significant.

The Project does not even stack up from an economic viewpoint:

NSW does not need more gas resources which fuel dangerous climate change, especially now the NSW government has approved a plan to nearly double the capacity of the Port Kembla gas terminal. This project could easily access cheap international gas prices and price Narrabri out of the market. Furthermore, an October 2019 report from Pegasus Economics states solar and wind is developing faster than expected, reducing in cost

and already displacing the need for gas-fired electricity.

The Assessment Report states the project would “put downward pressure on gas prices.” However the Institute for Energy Economic and Financial Analysis (IEEFA) states production costs at the Narrabri Gas Project are some of the highest in the country, with estimates to supply major domestic markets as high as \$9-10/GJ. Currently in Australia customers seeking long term contracts are paying between \$9-12/GJ to secure gas, leaving little room for profit generation. The project will clearly be at a globally uncompetitive price for gas.

Moreover, Aboriginal heritage is not adequately assessed and consent has not been obtained. The approach taken by Santos to site its facilities with the intention of avoiding “areas of high cultural heritage value to local Aboriginal groups” fails to understand the landscape scale connection to Country and the holistic responsibility as protectors of Country that is intrinsic to Gamilaraay culture.

Yours sincerely,

Kathryn Davy

Dear Independent Planning Commission,

You can include my name and submission on your website.

This is a submission on the Narrabri Gas Project.

I object to the proposed Narrabri Gas Project due to its significant environmental, heritage, social and economic impacts.

I am a parent and I believe it is our duty to leave a better planet for the next generations to come. The way companies and politicians are treating this planet is, a lot of times, outrageous as they only consider economic not ecological outcomes. There are thousands of scientists calling for change, experts in their fields, but they are ignored. It is time to put money into renewable energies - not fossil fuels!

There are areas in Australia which are struggling with droughts- water is scarce anywhere, but big developments are approved and companies like Santos are allowed to either waste precious water or endanger the water supplies of area.

Aboriginal heritage is not adequately assessed and consent has not been obtained. The approach taken by Santos to site its facilities with the intention of avoiding “areas of high cultural heritage value to local Aboriginal groups” fails to understand the landscape scale connection to Country and the holistic responsibility as protectors of Country that is intrinsic to Gamilaraay culture.

35 threatened species rely on the Pilliga for survival—including the endemic Pilliga Mouse, Squirrel Glider and Black-striped Wallaby. It also forms part of a stronghold for threatened woodland birds including the Glossy Black Cockatoo.

Dear Independent Planning Commission,

You can include my name and submission on your website.

This is a submission on the Narrabri Gas Project.

I object to the proposed Narrabri Gas Project due to its significant environmental, heritage, social and economic impacts.

It is a travesty to use coal seam gas fracking methods anywhere on the planet. Putting a cocktail of chemicals into the earth and groundwater is poisoning our lifeblood. Over 90 % of farmers and locals are opposed to CSG fracking, as they are living the disastrous effects already with their land dying around them. People in cities should not be allowed to impose their will on people who know how to manage the land. It is self evident that the Narrabri Gas Project is a disaster already, and extension of the area is a crime against the people and the land.

Due to the above reasons I strongly object to the Narrabri Gas Project. Thank you for the opportunity to comment. I look forward to hearing from you in regards to this submission.

Subject: I OBJECT to the Narrabri Gas Project
Date: Tuesday, 4 August 2020 12:20:23 AM

Dear Independent Planning Commission,

You can include my name and submission on your website.

This is a submission on the Narrabri Gas Project.

I object to the proposed Narrabri Gas Project due to its significant environmental, heritage, social and economic impacts.

As a recharge zone for the Great Artesian Basin, this is the last place one would want to place a fracking operation. Water is our most valuable asset in Australia, and the Basin is a strategic resource for the country. Further, gas is an industry with a limited lifespan, and to sacrifice a biological goldmine like the Pilliga for the short-term profits of a foreign company, for which we as a nation are unlikely to see much in real net benefits, is tantamount to wanton and criminal destruction of our State and national assets.

The community is opposed, the water needs our stewardship and the proponents and the government don't even have appropriate water models, Santos are not going to rehabilitate the area after destroying it, so we as taxpayers will be left to foot the real cleanup bill - really, this fails the test on every front.

Due to the above reasons I strongly object to the Narrabri Gas Project. Thank you for the opportunity to comment. I look forward to hearing from you in regards to this submission.

Yours sincerely,

Galen White

Subject: Environmentally damaging Narrabri Gas proposal
Date: Wednesday, 5 August 2020 3:16:18 PM

Dear Commissioners,

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

- The Pilliga is uniquely important for Gomeroi people, for biodiversity and water resources.

- Industrialising it with 850 coal seam gas wells and countless roads, power lines and pipelines will irreparably damage its cultural, ecological and hydrological values.

- It will bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

- This gasfield will add nearly 1 million tonnes every year to Australia's greenhouse gas emissions when our task is to reduce emissions by more than 7 million tonnes a year.

- And it won't even bring down gas or electricity prices for Aussies!

Our food production and our need to protect our natural ecology is far more important than gas production. Gas is a fossil fuel that needs to eventually be phased out, food has to be produced continually.

Yours sincerely Temple Eyre.

Yours sincerely,

Temple Eyre

Dear Commissioners,

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest. I have friends who live in the area and while I know not everyone is opposed to the economic imperative the environmental concerns are what are at stake.

- The Pilliga is uniquely important for Gomeroi people, for biodiversity and water resources.

- Industrialising it with 850 coal seam gas wells and countless roads, power lines and pipelines will irreparably damage its cultural, ecological and hydrological values.

- It will bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

- This gasfield will add nearly 1 million tonnes every year to Australia's greenhouse gas emissions when our task is to reduce emissions by more than 7 million tonnes a year.

- And it won't even bring down gas or electricity prices for Aussies!

Yours sincerely,

Laura Bruce

Dear Commissioners,

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

- The Pilliga is uniquely important for Gomeroi people, for biodiversity and water resources.

- Industrialising it with 850 coal seam gas wells and countless roads, power lines and pipelines will irreparably damage its cultural, ecological and hydrological values.

- It will bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

- This gasfield will add nearly 1 million tonnes every year to Australia's greenhouse gas emissions when our task is to reduce emissions by more than 7 million tonnes a year.

- And it won't even bring down gas or electricity prices for Aussies!

Please REJECT this proposal.

Yours sincerely,

James Brown

Box Hill North, Victoria, 3129, Australia

Dear Commissioners,

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

The Pilliga is uniquely important for the Gomerai people, for its biodiversity, history and important water resources.

I object to industrialising it with the proposed 850 coal seam gas wells, countless roads, power lines and pipelines that will irreparably damage its cultural, ecological and hydrological values.

To bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers as well as the resident AUSTRALIANS THAT OBJECT TO THIS DESTRUCTION TO THE LAND when there are other options available for fuelling the economy and households.

Not to mention that this gasfield will add nearly 1 million tonnes each year to Australia's greenhouse gas emissions even though our task is to reduce emissions by more than 7 million tonnes a year.

Commissioners, you must have some moral compass inside your heart that tells you what is right and that which is wrong. This does not benefit anyone in the long run - The Land, water, native animals, people, culture, flora and habitat - all worthy of a future that needs to be protected from monetary greed.

If you approve this dastardly project my will is that this destruction of environment and life will forever stain your conscience, for you will be the bearers of destruction.

Dear Commissioners,

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

- The Pilliga is uniquely important for Gomeroi people, for biodiversity and water resources.

- Industrialising it with 850 coal seam gas wells and countless roads, power lines and pipelines will irreparably damage its cultural, ecological and hydrological values.

- It will bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

- This gasfield will add nearly 1 million tonnes every year to Australia's greenhouse gas emissions when our task is to reduce emissions by more than 7 million tonnes a year.

- And it won't even bring down gas or electricity prices for Aussies!

The agricultural production of food and the protection of underground water reserves and the natural environment is far more important than short term money making for the few investors who are set to gain from the proposed mining activities. To let the mining go ahead stands out as a dereliction of duty by the government of the day and must be held to account for that! It's been proven overseas to be a human and environmental catastrophe yet government ignored the hard evidence!

If this goes ahead, then I believe there could be grounds for litigation.

Subject: Submission: 1 object to the Narrabri gas project
Date: Wednesday, 5 August 2020 2:31:17 PM

Dear Commissioners,

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

What are you all thinking??

You would all seriously risk so much??

Don't let this go ahead!!

- The Pilliga is uniquely important for Gomeroi people, for biodiversity and water resources.

- Industrialising it with 850 coal seam gas wells and countless roads, power lines and pipelines will irreparably damage its cultural, ecological and hydrological values.

- It will bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

- This gasfield will add nearly 1 million tonnes every year to Australia's greenhouse gas emissions when our task is to reduce emissions by more than 7 million tonnes a year.

- And it won't even bring down gas or electricity prices for Aussies!

Yours sincerely,

Ruth Erby

Cromer , New South Wales, 2099, Australia

This email was sent by Ruth Erby via Do Gooder, a website that allows people to contact you regarding issues they consider important. Date: Wednesday, 5 August 2020 2:31:25 PM

Dear Commissioners,

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

Contrary to the popular themes, Gas and CSG are not clean nor transition fuels in a de-carbonised economy. Recent evidence is clear that the industry has larger than admitted fugitive CH₄ emissions, leading to it being as disastrous for a future safe climate as burning coal.

The world already has known and developed reserves of fossil fuels, which if all is burned will raise the Global temperature by at least 4 degrees C. When we are seeing disastrous events at the present just over 1 degree C increase (above pre-industrial times), it is reckless and negligent to demolish a natural forest ecosystem to gain access to more dangerous fossil fuel in the form of CSG.

- The Pilliga is uniquely important for Gomerioi people, for biodiversity and water resources.

- Industrialising it with 850 coal seam gas wells and countless roads, power lines and pipelines will irreparably damage its cultural, ecological and hydrological values.

- It will bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

- This gasfield will add nearly 1 million tonnes every year to Australia's greenhouse gas emissions when our task is to reduce emissions by more than 7 million tonnes a year.

- And it won't even bring down gas or electricity prices for Aussies!

Yours sincerely,

Michael Pitcher

- The Pilliga is uniquely important for Gomeroi people, for biodiversity and water resources.

- Industrialising it with 850 coal seam gas wells and countless roads, power lines and pipelines will irreparably damage its cultural, ecological and hydrological values.

- It will bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

- This gasfield will add nearly 1 million tonnes every year to Australia's greenhouse gas emissions when our task is to reduce emissions by more than 7 million tonnes a year.

- And it won't even bring down gas or electricity prices for Aussies!

- On a more personal note, extended members of my family have been proud farmers in this region and it is heartbreaking to see one of the great farming regions of this country destroyed by short term greed.

Yours sincerely,

Dear Commissioners,

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

- That's the land on which we produce about 70 million potatoes, 1 million kilograms of peanuts, and enough wheat to make 3.5 million loaves of bread - every year.

We are groundwater irrigators, which means we rely entirely on underground water to grow all that food. All this and so much more is under threat from Santos' coal seam gas proposal.

Allow this environmental Nazism to continue and accept your cowardly, irresponsible, collusion in covertly enabling preventable, environmental degradation.

Yours sincerely,

Date: Wednesday, 5 August 2020 2:40:54 PM

Dear Commissioners,

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

- The Pilliga is uniquely important and its rivers, biodiversity and water resources belong to all Australians..

The proposed 850 coal seam gas wells and countless roads, power lines and pipelines will irreparably damage its cultural, ecological and hydrological values.

The gas extraction will consume up 1.5GL of water and create more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

This gasfield will add nearly 1 million tonnes every year to Australia's greenhouse gas emissions when our task is to reduce emissions by more than 7 million tonnes a year.

It won't bring down gas or electricity prices for Australians, will decimate the environment, will increase our greenhouse gas emissions, will add to our International embarrassment, strand our economy with toxic investments and infrastructure and is an illogical project to be approving at a time when renewable energy is becoming mainstream in every country, including ours.

Yours sincerely,

Anthony Poutsma

Date: Wednesday, 5 August 2020 2:42:45 PM

Dear Commissioners,

I ask you to reject Santos' (or any other company's) proposed Narrabri gasfield in the Pilliga forest.

Apart from the intrusion on indigenous land it is unacceptable for the damage it will cause to biodiversity and the visual landscape. And very importantly our water systems are precious and must not be contaminated or the use and storage of abused. More especially now than ever with towns running out of water.

There are alternative energy systems that will not cause these infringements on our land and Australian people prefer them. We must support systems that are beyond sustainable and serve the land and the people for the greater good.

The long term view is essential - we must consider future generations when we make these decisions.

- This gasfield will add nearly 1 million tonnes every year to Australia's greenhouse gas emissions when our task is to reduce emissions by more than 7 million tonnes a year.

- And it won't even bring down gas or electricity prices for Aussies!

Yours sincerely,

Helen Tomkinson

Subject: Submission: 1 object to the Narrabri gas project
Date: Wednesday, 5 August 2020 2:49:59 PM

Dear Commissioners,

We have lost too much native habitat. Renewable energy is a much better alternative as farmers can share their land with solar arrays and wind turbines hence adding to their income rather than detracting. Renewables are also better at providing jobs.

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

- The Pilliga is uniquely important for Gomeri people, for biodiversity and water resources.

- Industrialising it with 850 coal seam gas wells and countless roads, power lines and pipelines will irreparably damage its cultural, ecological and hydrological values.

- It will bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunedah Oxley Basin and local aquifers.

- This gasfield will add nearly 1 million tonnes every year to Australia's greenhouse gas emissions when our task is to reduce emissions by more than 7 million tonnes a year.

- And it won't even bring down gas or electricity prices for Aussies!

Date: Wednesday, 5 August 2020 2:50:44 PM

Dear Commissioners,

I would like you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

Clean Water resources should be THE Number 1 priority for NSW. This coal seam gas project will negatively impact water resources and hence the environment for ever.

Water is a limited resource essential for the environment, food production and healthy living.

For example:

- It will bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

The adverse impacts clearly outweigh any economic benefits and therefore recommend you oppose Santos' application.

Thank you

Pamela Gilbert

Chatswood, New South Wales, 2067, Australia

Dear Commissioners,

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest. Please set an example that inspires the people of this country and a level of land caretaking that will ensure a future for our land, our wildlife, our community and our food supplies.

- The Pilliga is uniquely important for Gomeroi people, for biodiversity and water resources.

- Industrialising it with 850 coal seam gas wells and countless roads, power lines and pipelines will irreparably damage its cultural, ecological and hydrological values.

- It will bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

- This gasfield will add nearly 1 million tonnes every year to Australia's greenhouse gas emissions when our task is to reduce emissions by more than 7 million tonnes a year.

- And it won't even bring down gas or electricity prices for Aussies!

Yours sincerely,

Dear Commissioners,

As a frontline medical worker I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

We need breathable air, a liveable climate and healthy crops to eat and healthy water to drink far more than we need the short term cash from fossil fuels.

Please put out precious tax dollars into sustainable long term healthy investment

- The Pilliga is uniquely important for Gomeroi people, for biodiversity and water resources.

- Industrialising it with 850 coal seam gas wells and countless roads, power lines and pipelines will irreparably damage its cultural, ecological and hydrological values.

- It will bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

- This gasfield will add nearly 1 million tonnes every year to Australia's greenhouse gas emissions when our task is to reduce emissions by more than 7 million tonnes a year.

- And it won't even bring down gas or electricity prices for Aussies!

Date: Wednesday, 5 August 2020 2:52:55 PM

Dear Commissioners,

Why would you risk destroying the Vital water supply to farms in the Narrabri area?

Sure we need jobs and money BUT this is JUST a Temporary FIX which will destroy the underground water supply. We need FOOD and CLEAN WATER Far more than we need a Quick get RICH plan that is a National Disgrace!!!

For example if I was to inject Anti Freeze and other dangerous chemicals into my backyard, I would be DRAGGED through COURT and FINED!!!

Why is it possible for huge corporate companies to use dangerous chemicals in a dangerous way?

Oh yeah I forgot the Liberals only care about Tax Money not the irreparable damage that this will Cause!!!

It's disgusting that YOU LIE to our faces and say this is a safe practice. End this now before its to late and the soul and water have been destroyed forever!!!

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

- The Pilliga is uniquely important for Gomerioi people, for biodiversity and water resources.

- Industrialising it with 850 coal seam gas wells and countless roads, power lines and pipelines will irreparably damage its cultural, ecological and hydrological values.

- It will bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

- This gasfield will add nearly 1 million tonnes every year to Australia's greenhouse gas emissions when our task is to reduce emissions by more than 7 million tonnes a year.

Subject: Submission: 1 object to the Narrabri gas project
Date: Wednesday, 5 August 2020 2:58:42 PM

Dear Commissioners,

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

- The Pilliga is uniquely important for Gomeroi people, for biodiversity and water resources. As Traditional custodians of this land, the Gomeroi people have kept their land in harmony with nature, and ensured the sustainability of the natural environment of the land that would keep the community thriving. The Narrabri coal seam gasfield would destroy biodiversity of the land and reduce water supply to the citizens living in the area, and also flora and fauna.

- Industrialising it with 850 coal seam gas wells and countless roads, power lines and pipelines will irreparably damage its cultural, ecological and hydrological values.

- It will bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

- This gasfield will add nearly 1 million tonnes every year to Australia's greenhouse gas emissions when our task is to reduce emissions by more than 7 million tonnes a year.

- there would be significant direct impacts on people's health due to loss of clean water, pollution of water supply, increase in emissions and all the subsequent health impacts due to pollution and climate change related health impacts.

Yours sincerely,

Lai Heng Foong

Glebe, New South Wales, 2037, Australia

Subject: Submission: 1 object to the Narrabri gas project
Date: Wednesday, 5 August 2020 3:01:40 PM

Dear Commissioners,

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest, because of the pollution.

- The Pilliga is uniquely important for Gomeroi people, for biodiversity and water resources.

- Industrialising it with 850 coal seam gas wells and countless roads, power lines and pipelines will irreparably damage its cultural, ecological and hydrological values.

- It will bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

- This gasfield will add nearly 1 million tonnes every year to Australia's greenhouse gas emissions when our task is to reduce emissions by more than 7 million tonnes a year.

- And it won't even bring down gas or electricity prices for Aussies! We should be looking to use alternatives.

Yours sincerely,

Sonia Bennett

Date: Wednesday, 5 August 2020 3:02:26 PM

Dear Commissioners,

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

About 70 million potatoes, 1 million kilograms of peanuts, and enough wheat to make 3.5 million loaves of bread - every year. - is produced on one property six kms downstream from these proposed new wells.

They are groundwater irrigators, which means they rely entirely on underground water to grow all that food.

All this and so much more is under threat from Santos' coal seam gas proposal.

It will risk the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

If COVID 19 has taught us anything, it has taught us to be a little more self-sufficient. As well as manufacturing, we need to take care of our food bowl. This will be here long after gas and the need for it are gone. To poison our arable lands is madness.

Yours sincerely,

Rachel Matthews

Subject: Submission: 1 object to the Narrabri gas project
Date: Wednesday, 5 August 2020 3:06:07 PM

Dear Commissioners,

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

- The Pilliga is uniquely important for Gomeroi people, for biodiversity and water resources.

- Industrialising it with 850 coal seam gas wells and countless roads, power lines and pipelines will irreparably damage its cultural, ecological and hydrological values.

- It will bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

- This gasfield will add nearly 1 million tonnes every year to Australia's greenhouse gas emissions when our task is to reduce emissions by more than 7 million tonnes a year.

- Over 20 years, Santos will remove 37.5 billion litres of water from deep below the Pilliga and removing this water will cause depressurisation and loss of water in the Pilliga Sandstone, the southern recharge of the Great Artesian Basin, which outcrops in the Pilliga.

- The Government's failure to implement the 2014 recommendations of the NSW Chief Scientist and Engineer amplifies the risks of this project and means it must be refused.

- And it won't even bring down gas or electricity prices for Aussies!

Yours sincerely,

Astrid Reinke

Dear Commissioners,

I would like to know what your alternative motives are. It makes no sense to the destroy the foundations of our existence.

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

- The Pilliga is uniquely important for Gomeroi people, for biodiversity and water resources. And should be important to each and every Australian. Including all Government representatives.

There is already enough industrial eye sores in this country. Without adding more for no other reason than to line pockets.

- Industrialising it with 850 coal seam gas wells and countless roads, power lines and pipelines will irreparably damage its cultural, ecological and hydrological values.

- It will bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

- This gasfield will add nearly 1 million tonnes every year to Australia's greenhouse gas emissions when our task is to reduce emissions by more than 7 million tonnes a year.

- And it won't even bring down gas or electricity prices for Aussies!

Subject: Submission: 1 object to the Narrabri gas project
Date: Wednesday, 5 August 2020 3:08:02 PM

Dear Commissioners,

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

I was recently in this area and able to admire the pristine night skies. It was the first time I was able to see the fantastic Milky Way spread across the night sky. It truly was wonderful. I am very concerned that Santos' plans to introduce 850 gas wells, and the resulting flares, will compromise the visibility in this world renowned Dark Sky Park.

In addition the Rural Fire Service has repeatedly expressed serious concerns about the operation of a gasfield and its burning flares in a highly flammable landscape like the Pilliga.

The assessment estimated the likelihood of a loss of containment in the gasfield creating a fire in the Pilliga was once in 70 years. That equates to a 35% chance during the life of the gasfield.

Please note that from December 2013 to January 2018, at least 17 Pilliga bushfires have been recorded. After last Summer's devastating fires, and with the current climate changes, that number might drastically increase.

I strongly urge you to object this Narrabri coal seam Gasfield.

Thank you for taking the time to read this submission.

Yours sincerely

Rosalind Bradley

Subject: Submission: 1 object to the Narrabri gas project
Date: Wednesday, 5 August 2020 3:08:04 PM

Dear Commissioners,

This is an historic decision and I recommend that you take Australia down the path towards renewable energy and a diversity of exports rather than allowing permission for a new gas project. There is no carbon budget left for new gas. Global tipping points and the effects of climate change are now being reached daily. This gas will accelerate climate disruptions and we have a moral imperative to keep it under ground. It would add nearly 1 million tonnes every year to Australia's greenhouse gas emissions when our task is to reduce emissions by more than 7 million tonnes a year. Also looking at the maps the Narrabri project is just the Trojan horse for many more petroleum and gas licences which you will be asked to approve.

With the drying out of the country and the mega bushfires which should have humbled us all, I think it is insane to permit a new gas field to open up in a forest with above ground flaring and risks to the Great Artesian basin water upon which we all depend. It will pump up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

I have just attended the energy ministers summit on line. There are so many opportunities for Green Hydrogen as an alternative to LNG. As one minister said "once a company has invested in new infrastructure they will ferociously defend their investment and drive policy for decades"

Please recognise the historic context in which you are making this planning decision. In a carbon constrained world there must be no new gas projects allowed. Plan for survival.

Yours sincerely,

Vivien Langford

Date: Wednesday, 5 August 2020 3:08:19 PM

To the Commissioners,

I strongly believe that you should reject Santos' proposed Narrabri gasfield in the Pilliga forest.

- The Pilliga is uniquely important for Gomeroi people, for biodiversity and water resources. I travelled through it when I was lecturing in rural geography and was impressed by its unspoilt nature which enables it to contribute to our biophysical environment in many ways.

- an invasion of 850 coal seam gas wells and countless roads, power lines and pipelines will, without question, irreparably damage its cultural, ecological and hydrological values and diminish the environment on which we all depend [including shareholders in Santos].

- It would bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

- This gasfield would add nearly 1 million tonnes every year to Australia's greenhouse gas emissions when we need to reduce emissions by more than 7 million tonnes a year. It would accelerate change in the climate and the decline in living conditions that this generation will unethically pass on to future generations.

Yours sincerely,

Dr Peter Krinks

Dear Commissioners,

As a marine scientist, I am acutely aware of the impact combustion of fossil fuels is having on marine ecosystems in Australia and globally, both via marine heatwaves and changing ocean chemistry. The evidence of impacts on ecosystems from the temperate to tropical zones is now overwhelming, and modeling indicates this will worsen the longer we continue using fossil fuels. It is for these, and other reasons, that I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest. The other reasons include that:

- The Pilliga is uniquely important for Gomeri people, for biodiversity and water resources.

- Industrialising it with 850 coal seam gas wells and countless roads, power lines and pipelines will irreparably damage its cultural, ecological and hydrological values.

- It will bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

- This gasfield will add nearly 1 million tonnes every year to Australia's greenhouse gas emissions when our task is to reduce emissions by more than 7 million tonnes a year.

- And it won't even bring down gas or electricity prices for Aussies!

Dear Commissioners,

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

- The Pilliga is uniquely important for Gomeroi people, for biodiversity and water resources.

- Industrialising it with 850 coal seam gas wells and countless roads, power lines and pipelines will irreparably damage its cultural, ecological and hydrological values.

- It will bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

- This gasfield will add nearly 1 million tonnes every year to Australia's greenhouse gas emissions when our task is to reduce emissions by more than 7 million tonnes a year.

- And it won't even bring down gas or electricity prices for Aussies!

- we need our farmers and farms stop raping our beautiful land. We need this food. It's obvious we cannot rely on anything from overseas. Please put livelihoods and our future food stability first instead of money.

Yours sincerely,

Jennifer Broady

Dear Commissioners,

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

- The Pilliga is uniquely important for Gomeroi people, for biodiversity and water resources.

- Industrialising it with 850 coal seam gas wells and countless roads, power lines and pipelines will irreparably damage its cultural, ecological and hydrological values.

- It will bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

- This gasfield will add nearly 1 million tonnes every year to Australia's greenhouse gas emissions when our task is to reduce emissions by more than 7 million tonnes a year.

- And it won't even bring down gas or electricity prices for Aussies!

Moreover, it expresses the insanity of people who would wreck the planet for the oily dollar. We all know the effects of industrialisation. This abomination at Narrabri is far more potent and ominous because of timing...industrialisation occurred when the earth still breathed. Narrabri would be the final poison to kill our earth...OUR EARTH.

You have no right to murder of our planet

Yours sincerely,

Adrian Keefe

Subject: Submission: 1 object to the Narrabri gas project
Date: Wednesday, 5 August 2020 3:13:14 PM

Dear Commissioner,

Please take action to protect & preserve not only the Pilliga, but the 1.7 million square kilometres (1/5th of the area of Australia) that will also be impacted by the Narrabri gasfield in the Pilliga forest. The Narrabri Gasfields project poses risks & threats to environment, sustainable agriculture & sacred indigenous sites. It must not be allowed to proceed.

The risks of irreversible damage to the Great Artesian Basin (GAB) & other vital water supplies & recharging of these, is not only dangerous to depended farming & indigenous communities, well out into South Australia, but the native flora & fauna that is unique & dependent on this vital supply. .

Proposing a pipeline through farmland in our area, with our home & farmland also in the "fallout zone" (environmental impact zone as deemed by the paperwork on the proposal) has potential to also destroy the agriculture & native animals & vegetation of this area including my home & my families livelihood.

1/3 of NSW is dependent on The GAB, & if not for this great water resource during this recent horrendous drought, There would have been a disaster of epic proportions, greater than what occurred due to our reliance on water to sustain LIFE. .

- This gasfield will add nearly 1 million tonnes every year to Australia's greenhouse gas emissions when our task is to reduce emissions by more than 7 million tonnes a year.

-The Gas is not even destined for use in Australia (less than 5%) yet will destroy much much more.

Yours sincerely,

Kath Fragar

Subject: Submission: 1 object to the Narrabri gas project
Date: Wednesday, 5 August 2020 3:17:04 PM

Dear Commissioners,

I do not live in NSW but have a keen interest in the Narrabri gasfield issue having been a semi-regular visitor to the area since 1970. I find it very hard to believe that this development can go ahead without significant damage to the Pilliga forest, the agricultural base in the area and the water matters as noted below.

To grant approval to this project puts the short term (very short term in the context of the region's Aboriginal history) advantages of more gas and a handful of local jobs ahead of the risks of long term damage to the environment, natural beauty, agricultural value not to mention the water supply.

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

- The Pilliga is uniquely important for Gomeroi people, for biodiversity and water resources.

- Industrialising it with 850 coal seam gas wells and countless roads, power lines and pipelines will irreparably damage its cultural, ecological and hydrological values.

Dear Commissioners,

Please for the sake of our nation stop this senseless destruction of the Great Artesian Basin. Mining for coal seam gas is destructive and unnecessary. With the cost of renewable electricity falling rapidly it is now feasible and desirable to produce Hydrogen gas at little or no cost to the environment. Hydrogen can replace natural gas and coal seam gas for domestic use, and can be a great export earner for the country.

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

Subject: Submission: 1 object to the Narrabri gas project
Date: Wednesday, 5 August 2020 3:24:39 PM

Dear Commissioners,

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

- The Pilliga is uniquely important for Gomeroi people, for biodiversity and water resources.

- Industrialising it with 850 coal seam gas wells and countless roads, power lines and pipelines will irreparably damage its cultural, ecological and hydrological values.

- It will bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

- This gasfield will add nearly 1 million tonnes every year to Australia's greenhouse gas emissions when our task is to reduce emissions by more than 7 million tonnes a year.

- And it won't even bring down gas or electricity prices for Aussies!

Our groundwater is such a precious resource - please, let's protect it. Please, let's mitigate climate change. Please, let's develop sustainable energy sources. Please, let's do the decent thing and stop CSG projects.

Yours sincerely,

Angelique Gellert

Mullumbimby, New South Wales, 2482, Australia

Dear Commissioners,

Please reject Santos' proposed Narrabri gasfield in the Pilliga forest.

This first is uniquely important for Gomeroi people, for biodiversity and water resources.

Do not let it be turned into a wasteland bereft of Gomeroi culture, and of water for anything else - there will be no water for animals or people or even plants when these aquifers are drained or polluted.

This will increase emissions not reduce them when we all need to be cutting carbon pollution - and fast.

It won't bring down energy prices; only delay the transition we need to make. It comes at too greater cost to the planet.

Yours sincerely,

Nola Farman

Subject: Submission: My objection to the Narrabri gas project
Date: Wednesday, 5 August 2020 2:48:21 PM

Dear Commissioners,

We are at a cross roads in the battle for a sustainable future and a meaningful response to catastrophic climate change.

Fossil fuels like methane gas and coal are not the solution, they are a part of the problem.

The idea that ending the Narrabri project should cause an expansion of the Port Kembla gas import terminal does not make economic or ecologic sense!

We desperately need more renewable sources of energy, not more of the old business as usual (non) solutions.

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

- The Pilliga is uniquely important for Gomeroi people, for biodiversity and water resources.

- Industrialising it with 850 coal seam gas wells and countless roads, power lines and pipelines will irreparably damage its cultural, ecological and hydrological values.

- It will bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

Dear Commissioners,

To earn the moral salt (as opposed to toxic salt which Santos wishes to poison the land with) which ought to accompany your positions, you must reject Santos' proposed Narrabri gasfield in the Pilliga forest.

You know (and how could you not?) that the Pilliga is uniquely important for Gomeroi people, for biodiversity and water resources.

Only people or businesses of the worst moral and social turpitude would countenance industrialising the area with 850 coal seam gas wells and countless roads, power lines and pipelines. All these will irreparably damage its cultural, ecological and hydrological values.

The Santos plan would bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

But sure, go ahead and allow this gasfield to add nearly 1 million tonnes every year to Australia's greenhouse gas emissions when our task is to reduce emissions by more than 7 million tonnes a year. Hope your pay is worth the hell this would introduce to the environment. Good luck stuffing that dirty genie back in its gas bottle. Or preferably just say no, dammit, do your bit to make this planet more inhabitable, not less.

Yours sincerely,

Rachel Westwood

Date: Wednesday, 5 August 2020 2:26:29 PM

Dear Commissioners,

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest for the following reasons.

- The Pilliga is uniquely important for Gomeroi people, for biodiversity and water resources.
- Industrialising it with 850 coal seam gas wells and countless roads, power lines and pipelines will irreparably damage its cultural, ecological and hydrological values.
- I understand it will bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.
- This gasfield will add nearly 1 million tonnes every year to Australia's greenhouse gas emissions when our task is to reduce emissions by more than 7 million tonnes a year.
- And it won't result in a reduction in gas or electricity prices for Australian consumers.

Yours sincerely,
Harry Knowles

This email was sent by Harry Knowles via Do Gooder, a website that allows people to contact you regarding issues they consider important. Subject: Submission: Please reject to the Narrabri gas project
Date: Wednesday, 5 August 2020 3:13:16 PM

Dear Commissioners,

I urge you to totally reject Santos' proposed Narrabri gasfield in the Pilliga forest.

I struggle to understand how this coal seam gas project can be approved when there is various clean energy alternatives that don't have massive impacts on flora, fauna and the Great Artesian Basin. Please reject outright and take into account the following considerations:

- Industrialising the Pilliga with 850 coal seam gas wells and countless roads, power lines and pipelines will irreparably damage its cultural, ecological and hydrological values.

- It will bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

- This gasfield will add nearly 1 million tonnes every year to Australia's greenhouse gas emissions when our task is to reduce emissions by more than 7 million tonnes a year.

- The Pilliga is uniquely important for Gomeroi people, for biodiversity and water resources.

- And it won't even bring down gas or electricity prices for Aussies!

Please reject the Narrabri Gas project.

Yours sincerely,

From: [Joy Dahl](#)
To: [IPCN Enquiries Mailbox](#)
Subject: Submission: Along with my family in Tamworth & surrounds I object to the Narrabri gas project
Date: Wednesday, 5 August 2020 4:08:24 PM

Dear Commissioners,

I urge you to reject Santos' proposed Narrabri Gas Field in the Pilliga forest.

OBJECTION TO SANTOS PLANS

My husband is from Tamworth and many friends and family still live, farm and work in Narrabri and surrounds. This is precious land which needs to be protected from Fracking, Coal Seam Gas Wells and associated works. This negatively affects all those in the surrounding area, as well as the rest of Australia.

Below are a few of the many reasons to stop Santos developing new coal seam gas wells across 95,000 hectares in the north eastern part of the Pilliga forest near Narrabri and clearing close to 1,000 hectares of the forest in small patches and connecting lines in the process.

- This project is the most controversial in the history of the NSW planning law. The Environmental Impact Statement attracted 22,721 submissions, of which 98% were objections. The majority (63%) of the 470 submissions from the immediate local area were also objections.

- The release of the Assessment Report by the Department of Planning includes a list of recommended Conditions of Consent, should the project be approved.

- Of the 16 recommendations made by the NSW Chief Scientist in 2014 to guard against the risks of coal seam gas, only 2 have been fully implemented, and half haven't been done at all.

Santos will remove 37.5 billion litres of water from deep below the Pilliga and treat it in the Leewood treatment facility. This treatment will produce up to 840,000 tonnes of solid salt, laced with heavy metals, for which Santos still has no disposal plans.

- Santos has used the most basic level of groundwater model because so little is known about the deep aquifers they will de-water to extract gas.

- Santos anticipates leakage from the precious alluvium that lies above the coal seams despite claiming there is no linkage between the water sources. Landholders that rely on the GAB, the Gunnedah Oxley Basin and other groundwater in the area are strongly opposed to the project.

**THE USA RECORD RE: COAL SEAM GAS is documented in <https://frackinginquiry.nt.gov.au/inquiry-reports/final-report>

This report further authenticates these negative impacts, as does a previous report, below.

<https://www.environment.gov.au/system/files/resources/5d509ac8-5a0c-4262-9dac-49b89b2b246d/files/reference-list-research-report-1.pdf>

SOCIAL & ECONOMIC IMPACTS

The Pilliga Forest will become a far more volatile bushfire danger with the proposed gas-field.

- Coal seam gas brings upheaval and division to rural communities. A CSIRO survey in 2014 found that only 6% of local people living in Queensland gas-field areas thought the industry had improved their lives while 42% said that they were “not coping” or “only just coping”.[1]

- Santos’ own assessment found that there would be “almost certain” impacts on housing affordability for Narrabri residents, which will disproportionately affect low-income households and Indigenous people, who are far more likely to be renters.

JOB CREATION CLAIMS, CRUCIAL TO SUBSTANTIATING THE PROJECT ARE OVERESTIMATED.

Only estimated is an average of 190 jobs created locally and 322 in the rest of the state, but this comes at other industries’ expense. Santos’ own assessment admits there would be lost employment in agriculture and manufacturing as a result of the project, despite unsubstantiated claims of flow on jobs in NSW.

- Santos claims the gas-field is needed to “increase supplies” of gas. Yet, there’s a glut of exported gas from Queensland and ships of Australian gas are sitting idle unwanted.[2]

- The majority of social impacts will actually not be mitigated, as is usually the case with these large industrial projects, because so many of the negative impacts are ignored for the financial gain of Santos.

ABORIGINAL HERITAGE PROTECTION

- As everyone knows, it’s not just the 90 isolated specific sites Santos has identified that are culturally significant, it’s the the Pilliga Forest itself and many more unacknowledged sites, known only to the Gomeroi people, as they should remain.

- Santos promises its drill pads and infrastructure will avoid just these specific sites.

. PROMISES, PROMISES! Look what Rio Tinto did. Once these companies start invading the earth - nothing stops them.

- Mobilising methane in coal seams will lock in ongoing fugitive emissions of this potent greenhouse gas for decades to come. The USA experience proves this (see links above**)

• Globally, the UN Environment Program Production Gap Report in 2019 found that, “With average lifetimes of 20 years or longer for pipelines, terminals, wells, and platforms, the time to begin planning for a wind-down of gas production is, as with other fossil fuels, already upon us.”

• So why start up now, when we should be winding down fossil fuels, including gas production? We should be revving up sustainables, providing quicker, more economical recovery from COVID 19 for our whole country.

• Santos’ plans for CSG, threatens NSW’s last great inland forest, the Pilliga, the surrounding productive Narrabri farmland and the Great Artesian basin, inland Australia’s essential water source. Do not allow these plans to go ahead.

Date: Wednesday, 5 August 2020 4:52:06 PM

Dear Commissioners,

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

It is past the time that everybody and particularly our politicians and anybody in local government or in business, especially the various tentacles of the mining industry realise that we are animals, albeit of the human kind, and we all need to EAT. Without food we all die. To grow food we need good fertile soil WHICH HAS ADEQUATE ACCESS TO CLEAN PURE WATER IN CONTINUOUS QUANTITIES.

This requirement is under a very dangerous threat if we continue to consider any mining operations anywhere near the Great Artesian Basin.

- The Pilliga is uniquely important for Gomeroi people, for biodiversity and water resources.

- Industrialising it with 850 coal seam gas wells and countless roads, power lines and pipelines will irreparably damage its cultural, ecological and hydrological values.

- It will bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

- This gasfield will add nearly 1 million tonnes every year to Australia's greenhouse gas emissions when our task is to reduce emissions by more than 7 million tonnes a year.

Dear Commissioners,

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

The Pilliga is uniquely important. As a veterinary nurse, I value its extensive woodland forest which provides irreplaceable habitat for a wide range of native Australian fauna. God knows last years extensive bushfires have killed enough flora and fauna nationally already. Australia simply can't afford to lose anymore.

The Pilliga region is also valuable farm land and Australia needs to maintain and expand our capacity to produce our own food. Not put it at risk. Covid19 has shown us, in stark ways, how important it is for our nation to be independently food secure. We need this land for food production not gas energy supply. We can make energy in many different ways that don't involve this land. But we can't grow food everywhere.

I worry that the 850 coal seam gas wells will industrialise The Pilliga to the point that it risks The Great Artesian Basin beneath, further salinating the land, contaminating farm land, and irretrievably risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers. Australia is one of the driest continents in the world. We can't afford to risk our scarce water supplies for the sake of a short-term gas drilling project.

From an international perspective, developing the Narrabri coal seam gasfield does absolutely nothing to reduce Australia's greenhouse gas emissions, In fact it increases them, substantially. Frankly, the Narrabri Gas project is an international embarrassment because it stands in direct contradiction to the international greenhouse gas emission reduction targets Australia has already committed to. Australia has global obligations to reduce greenhouse gas emissions and the Narrabri coal seam gasfield directly renegs on those commitments.

Finally, the Narrabri coal seam gasfield offers Australians nothing in exchange for the loss of our native animals and natural assets, the possible contamination of a major long-term clean water source and the potential compromise of our national food supply. It won't even bring down gas or electricity prices for Aussies!

It is for all these reasons that I again I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

Yours sincerely,
Desiree Marshall

Dear Commissioners,

Global warming and it's growing consequences cannot be ignored any longer!

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

- The Pilliga is uniquely important for Gomeroi people, for biodiversity and water resources.

- Industrialising it with 850 coal seam gas wells and countless roads, power lines and pipelines will irreparably damage its cultural, ecological and hydrological values.

- It will bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

- This gasfield will add nearly 1 million tonnes every year to Australia's greenhouse gas emissions when our task is to reduce emissions by more than 7 million tonnes a year.

- And it won't even bring down gas or electricity prices for Aussies!

Yours sincerely,

Jonathan Peter

Woodwark, Queensland, 4802, Australia

Dear Commissioners,

AS a South Australian I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest which is a concern to all Australians. Again the risk is run of entirely ignoring Traditional Owners at this time of world concern for such.

I live in a Murray River town and am concerned about the effect of water poisoning through the system. Also about the underground water table being affected.

It is frightening when we are assured by proponents of such a scheme that all is safe and nothing will be harmed.

This only proves that the proponents are either extraordinarily ignorant of geography/land and water systems or they are attempting to cover up the dangers.

- The Pilliga is uniquely important for Gomeroi people, for biodiversity and water resources.

- Industrialising it with 850 coal seam gas wells and countless roads, power lines and pipelines will irreparably damage its cultural, ecological and hydrological values.

- It will bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

- This gasfield will add nearly 1 million tonnes every year to Australia's greenhouse gas emissions when our task is to reduce emissions by more than 7 million tonnes a year.

- And it won't even bring down gas or electricity prices for Aussies!

From: [Anne Peaston](#)
To: [IPCN Enquiries Mailbox](#)
Subject: Submission: 1 object to the Narrabri gas project
Date: Wednesday, 5 August 2020 4:48:34 PM

Dear Commissioners,

I strongly urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

Given the history of Santos' other Pilliga operations and indeed similar projects elsewhere, the proposed project for over 800 wells and associated infrastructure inevitably carries a risk of high impact adverse effects on the region and in particular on the Great Artesian Basin Southern recharge, the Gunnedah Oxley Basin and local aquifers.

These water resources are irreplaceable for farmers in the area, particularly in the face of global warming and reducing natural rainfall.

Compromise of the water supply and its quality threatens a massive amount of food production.

Damage of the water supply together with emplacement of the infrastructure associated with the wells is also a serious threat to the biodiversity and natural environment of the Pilliga. This is particularly important for the traditional occupants, the Gomeri people, and we have a duty to help them protect the land from industrial damage to fundamental resources, especially on the scale proposed.

Finally, to me it is complete idiocy to proceed with a project that substantially (1 million tonnes p.a.) adds to greenhouse gas emission in this country.

Global warming and water resourcing are the two most important existential issues facing our country and our world and this project does not seek to ameliorate either. Rather it seeks to recklessly use and likely damage a public good, water, in a project which will add to greenhouse gas emissions. This represents a short term gain for the company in income, but medium and long term losses to the local inhabitants, and indeed Australia.

Date: Wednesday, 5 August 2020 4:44:01 PM

Dear Commissioners,

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest. It is an important site for the Gomeri people, for biodiversity and water resources. The project will drain the Great Artesian Basin for ever and threaten agriculture and water supply for millenia to come.

The project is a project of environmental vandalism, with no lasting social or economic benefit for the Australian people - in particular it will not make gas cheaper for the local consumer. Its greenhouse gas emissions will harm us, our neighbours and the world's population at large.

I am a physician and already have to deal with the human consequences of natural and man made disasters - our communities are highly stressed and anxious, and starting to majorly getting depressed about the here and now and the future for themselves and their children and grandchildren.

Yours sincerely,
Joachim Sturmberg
Holgate, New South Wales, 2250, Australia

Subject: Submission: 1 object to the Narrabri gas project
Date: Wednesday, 5 August 2020 4:41:59 PM

Dear Commissioners,

I am writing to request that you urge you turn down Santos' proposed Narrabri gasfield in the Pilliga forest. There are a number of compelling reasons why the gasfield should not go ahead. I outline them below:

- The Pilliga is a key area for biodiversity and water resources. It is also of special significance to the Gomeri people.

- If it is industrialised with 850 coal seam gas wells and all the infrastructure required to operate, it will substantially damage the ecology, water and cultural properties of this area.

- The field operations will waste up 1.5GL of water and create more than 13,000 tonnes of toxic salts every year. In a country where land and water are precarious, it is irresponsible to risk the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

- This gasfield will add close to 1 million tonnes every year to Australia's greenhouse gas emissions at a time when our task is to reduce emissions by more than 7 million tonnes a year.

- Adding insult to injury, this operation won't even bring down gas or electricity prices for Australians.

Yours sincerely,

Helene Zampetakis

New South Wales, 2540, Australia

Subject: Submission: 1 object to the Narrabri gas project
Date: Wednesday, 5 August 2020 4:39:39 PM

Dear Commissioners,

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

I have been there and seen the devastation caused by spills. Australia can not afford to mine for gas in this way. It is madness to even think of putting the great artisan basin at any risk. We can not eat gas and it is also a energy source that can be done without especially with renewable energy sources so quickly coming about.

The reasoning that this gas project is needed as an energy source while renewables come on line doesn't add up. The majority of the gas is for export and it won't bring our energy prices down.

It all smells of greed and propping up a failing fossil fuel industry.

- The Pilliga is uniquely important for Gomeroi people, for biodiversity and water resources.

- Industrialising it with 850 coal seam gas wells and countless roads, power lines and pipelines will irreparably damage its cultural, ecological and hydrological values.

- It will bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

- This gasfield will add nearly 1 million tonnes every year to Australia's greenhouse gas emissions when our task is to reduce emissions by more than 7 million tonnes a year.

- And it won't even bring down gas or electricity prices for Aussies!

Subject: Submission: 1 object to the Narrabri gas project
Date: Wednesday, 5 August 2020 4:38:01 PM

Dear Commissioners,

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

- The Pilliga is uniquely important for Gomeroi people, for biodiversity and water resources.
 - Industrialising it with 850 coal seam gas wells and countless roads, power lines and pipelines will irreparably damage its cultural, ecological and hydrological values.
 - It will bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.
 - This gasfield will add nearly 1 million tonnes every year to Australia's greenhouse gas emissions when our task is to reduce emissions by more than 7 million tonnes a year.
 - And it won't even bring down gas or electricity prices for Aussies!
- Also, one can live without gas but NOT water!

Yours sincerely,
Jan van de Waal
New South Wales, 2370, Australia

Date: Wednesday, 5 August 2020 4:29:49 PM

Dear Commissioners,

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

- The Pilliga is unique and of great important for Gomeroi people, for biodiversity and clean water resources.

- Industrialising it with the proposed 850 coal seam gas wells and countless roads, power lines and pipelines will irreparably damage its cultural, ecological and hydrological values.

- It will bring up 1.5GL of water and over 13,000 tonnes of toxic salts annual. This puts th Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and all local aquifers at huge risk.

- This gasfield will add nearly 1 million tonnes every year to Australia's greenhouse gas emissions. I find this curious as our agreed commitment is to reduce emissions by more than 7 million tonnes every year.

- All the above supply of local energy will not even bring down gas or electricity prices for Aussies!

Yours sincerely,

Lesley Killen

Mitcham Shopping Centre, South Australia, 5062, Australia

From: [Ron Mackay](#)
To: [IPCN Enquiries Mailbox](#)
Subject: Submission: 1 object to the Narrabri gas project
Date: Wednesday, 5 August 2020 4:22:43 PM

Dear Commissioners,

This is very important to my family and I. I feel in the modern politically correct environment we live, it is more often than not, NOT ok to object or stand up and say "NO" for fear of being belittled, seen as an extremist or similar.

We are dry land farmers producing winter crops, sheep, wool and cattle.

Due to nature of our heavy self mulching soils it is impossible to source water reliably other than from the GAB.

My family have been on this property since 1918. The next generation are involved with the farm. Without reliable water it will be impossible to continue farming.

From the information available it appears that the gas fields will have a limited life span of approximately 20-25 years. Hardly a worthwhile risk to water when compared to the longevity of sustainable agriculture.

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

- The Pilliga is uniquely important for Gomeroi people, for biodiversity and water resources.

- Industrialising it with 850 coal seam gas wells and countless roads, power lines and pipelines will irreparably damage its cultural, ecological and hydrological values.

- It will bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

- This gasfield will add nearly 1 million tonnes every year to Australia's greenhouse gas emissions when our task is to reduce emissions by more than 7 million tonnes a year.

- And it won't even bring down gas or electricity prices for Aussies!

The gas can be sourced at a later time if required once fool proof technologies are proven. Unfortunately if the water is fouled it won't be able to be fixed.

Thank you for the opportunity to have my concerns tabled before you. You are in a difficult position but I am sure commonsense will prevail.

Yours sincerely,

Ron Mackay

Subject: Submission: 1 object to the Narrabri gas project
Date: Wednesday, 5 August 2020 4:14:41 PM

Dear Commissioners,

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

The Great Artesian Basin is too important to Australia to be put at risk.

Without the beautiful source of water from the GAB, the farms and communities out here in North West NSW will not be able to survive. There is no better way to highlight this fact than looking at the extended drought experienced out here since late 2016.

With the lowest rainfall on record during this period, the community and farms heavily relied on this source of water for 4 years. There was no other option. Personally we live on a farm with no bore water. For this period of time we had to cart bore water from neighbouring farms for many houses on our farm. What this has highlighted is how important this source of water is to the rural community and farming business'. Luckily it has rained again but one thing is for certain, we will see another drought. Please do not risk damaging the amazing Great Artesian Basin, our one reliable source of water.

I ask, can you be certain the water from the artisan basin will not be affected? Can you be certain the waste water will not cause damage to the environment, the business' and people in the area?

If it is approved, who is accountable for the damage it causes to the GAB, to the quality of its water supply, for the potential heavy metals in the food grown, and the long established communities? Please do not sacrifice this water and our communities for an export market. You have the chance to stop this now. There are other energy options and ways for our country to prosper and progress.

Please put the long established agricultural industry before the new mining industry in this area. Please be 100% certain it will not cause any environmental damage and risk to communities. The coal seam isn't going anywhere. There is not rush. NSW must get this right.

Thank you for taking the time to read my submission.

Date: Wednesday, 5 August 2020 4:14:03 PM

Dear Commissioners,

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

I understand you are under huge pressure internationally to continue the mandate that Australia is a mine for the world. But it doesn't have to be this way.

Not selling out Australians, our land, water, jobs, culture, healthy food production and environment for future generations, surely would make you feel better about your working life and the contribution you have made for the future than selling us out for, we can only presume - personal gain.

As you well know the facts are :

850 coal seam gas wells with countless roads, power lines and pipelines will irreparably damage this valuable region.

The 1.5GL of water and more than 13,000 tonnes of toxic salts brought above ground every year risk the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin, local aquifers and will pollute the land and the health of communities, flora and fauna for generations.

It is unbelievable when such incredible suffering has recently been caused by the drought and fires that you, as Australians responsible for the wellbeing of other Australians, would willingly directly create further suffering, this gasfield will add nearly 1 million tonnes every year to our greenhouse gas emissions. How can you accept that when our task is to reduce emissions by more than 7 million tonnes a year. It is diabolical that this is even being considered.

Please let your humanity and consideration for the wellbeing of your fellow countrymen and women prevail - please do not cave in to corporate interests and pressure this time. Thank you in anticipation

- And it won't even bring down gas or electricity prices for Aussies!

- The Pilliga is uniquely important for Gomeroi people, for biodiversity and water resources.

-

Dear Commissioners,

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

- The Pilliga is uniquely important for Gomeroi people, for biodiversity and water resources.

- Industrialising it with 850 coal seam gas wells and countless roads, power lines and pipelines will irreparably damage its cultural, ecological and hydrological values.

- It will bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

- This gasfield will add nearly 1 million tonnes every year to Australia's greenhouse gas emissions when our task is to reduce emissions by more than 7 million tonnes a year.

- And it won't even bring down gas or electricity prices for Aussies!

Its time to strongly protect these lands and waters, the natural environment, ecosystems and biodiversity.

Yours sincerely,

Sean Corrigan

Clifton Beach, Queensland, 4879, Australia

Subject: Submission: 1 object to the Narrabri gas project
Date: Wednesday, 5 August 2020 4:09:06 PM

Dear Commissioners,

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

The risks to vital groundwater resources from an 850 well gasfield are just too great. Local residents & farmers rely on groundwater for everyday living - for washing, showering and their gardens. They have no other reliable source of water.

Locals are deeply concerned about the things that are priceless: clean air, clean water, and land to grow clean, healthy food. The area produces potatoes, peanuts & grain. Agribusiness like this employs hundreds of workers.

- The Pilliga is uniquely important for Gomeroi people, for biodiversity and water resources.

- Industrialising it with 850 coal seam gas wells and countless roads, power lines and pipelines will irreparably damage its cultural, ecological and hydrological values.

- It will bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

There have already been at least a dozen spills and incidents from Santos' operations in the Pilliga including a fine for poisoning a local aquifer.

- This gasfield will add nearly 1 million tonnes every year to Australia's greenhouse gas emissions when our task is to reduce emissions by more than 7 million tonnes a year.

- And it won't even bring down gas or electricity prices for Aussies!

Yours sincerely,

June Keats

Subject: Submission: 1 object to the Narrabri gas project
Date: Wednesday, 5 August 2020 4:03:12 PM

Dear Commissioners,

Why on earth would anyone condone letting gas fields etc destroy the land that feeds us, do you not care about the environment and the food that people have to have, it has been said that there is not enough food in the world but now if this is approved it will mean more land out of production, This means less food I ask you since

Also why are we always hearing about the global warming etc but yet if this is approved it can do nothing except add to the pollution of our air and our under ground water,. Irrigators are not allowed the water they need to produce food

Yet if this is approved it will as stated pollute more of our under ground water, why would any one want to see this happen ??

Therefore

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

- The Pilliga is uniquely important for Gomeri people, for biodiversity and water resources.

- Industrialising it with 850 coal seam gas wells and countless roads, power lines and pipelines will irreparably damage its cultural, ecological and hydrological values.

- It will bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

Dear Commissioners,

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

Australia's environment is under enough stress as it is.

I believe it unnecessary to have to go into detail here as the bad news about its sad state and its ongoing destruction reach you and me on a daily basis.

It is extremely difficult to comprehend why projects like this one from Santos for example are even on the table for discussion. My brother in Switzerland was, for years, fighting for the most beautiful stretch of greenery near his town. There Santos planned to destroy the townpeople's loved place of recreation, for salt extraction! In the end the people's outcry was fortunately heard.

Those battles for our environment are extremely stressful, I must say, even for only an onlooker like me. Hence my plea to you.

Your decision will affect not only the local Flora & Fauna and people, it will in the long run affect our planet and its citizens.

Yours sincerely (with a heart full of hope),

Subject: Submission: 1 object to the Narrabri gas project
Date: Wednesday, 5 August 2020 4:02:04 PM

Dear Commissioners,

Without water we have nothing.

Water trumps gas.

The risk to the underground aquifers is too great to risk them. If the aquifers are damaged, and the water slowly leaks out over coming decades (because it could take a long time) this region would become arid.

No one would be able to live in Narrabri, Wee Waa or surrounding towns because there would be no water supply. It's not just agriculture which would suffer.

Is it really worth it, for a few years' worth of gas and a dozen or so temporary jobs?

A standard risk assessment matrix will tell you, "no". Even if the risk is small, the consequences are catastrophic.

Once the aquifer is destroyed, there will be no going back. This will be forever. You have our future in your hands. Your decision could destroy all of us. Please do not take this responsibility lightly.

Yours sincerely,
Julia Petzl-Berney

Dear Commissioners,

I am extremely concerned about Santos' proposed Narrabri gasfield in the Pilliga forest.

This is just such a shortsighted proposal, given that the world is moving away from fossil fuels, that the long term outcomes of disturbing the geological nature of the land is unknown, as is its effects on the water tables.

This is a fertile land, providing significant amounts of food and it is of great importance to the Gomeroi people.

The infrastructure in terms of roads, power lines and pipelines will greatly disturb the land and its uses.

Please, I urge you, reject this short sighted proposal and put your efforts into developing renewable resources that will help our land to prosper and not damage it.

Thank you,

Yours sincerely,

Subject: Submission: I object to the Narrabri gas project
Date: Wednesday, 5 August 2020 3:50:54 PM

Dear Commissioners,

I object to the Narrabri gas project.

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

- The Pilliga is uniquely important for Gomeroi people, for biodiversity and water resources.

- Industrialising it with 850 coal seam gas wells and countless roads, power lines and pipelines will irreparably damage its cultural, ecological and hydrological values.

- It will bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

- This gasfield will add nearly 1 million tonnes every year to Australia's greenhouse gas emissions when our task is to reduce emissions by more than 7 million tonnes a year.

- And it won't even bring down gas or electricity prices for Aussies!

Yours sincerely,

Carolyn Smith

Toongabbie East, New South Wales, 2146, Australia

Dear Commissioners,

Please reject Santos' proposed Narrabri gasfield in the Pilliga forest.

The Pilliga is uniquely important for Gomeroi people, for biodiversity and water resources.

Industrialising this area will irreparably damage its cultural, ecological and hydrological values and will bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

It will truly be a disgrace if this project proceeds.

Yours sincerely,

Patricia and William Hucker

Date: Wednesday, 5 August 2020 3:48:48 PM

Dear Commissioners,

I'm deeply disturbed by the lack of accurate information on natural gas extraction and use.

The true amount of greenhouse gas emissions via leakage and other loss are rarely acknowledged.

Additionally the irrecoverable loss of farmland is a reckless and myopic disaster.

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

- The Pilliga is uniquely important for Gomeroi people, for biodiversity and water resources.

- Industrialising it with 850 coal seam gas wells and countless roads, power lines and pipelines will irreparably damage its cultural, ecological and hydrological values.

- It will bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

- This gasfield will add nearly 1 million tonnes every year to Australia's greenhouse gas emissions when our task is to reduce emissions by more than 7 million tonnes a year.

- And it won't even bring down gas or electricity prices for Aussies!

Subject: Submission: 1 object to the Narrabri gas project
Date: Wednesday, 5 August 2020 3:43:43 PM

Dear Commissioners,

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest. There are many reasons why this project should not go ahead but, as I see it, the threat to water - The Great Artesian Basin - is of overriding concern.

- The Pilliga is uniquely important for Gomeroi people, for biodiversity and water resources. and the GAB is vital to their survival - and to that of all farmers and others in the huge area; we cannot afford to endanger supply or quality of this water.

- Industrialising it with 850 coal seam gas wells and countless roads, power lines and pipelines will irreparably damage its cultural, ecological and hydrological values.

- It will bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

- This gasfield will add nearly 1 million tonnes every year to Australia's greenhouse gas emissions when our task is to reduce emissions by more than 7 million tonnes a year, it's time we took climate change seriously

To proceed with this project would be hugely irresponsible.

Yours sincerely,

Jenny Coman,

Bangalow, 2479

- Industrialising it with 850 coal seam gas wells and countless roads, power lines and pipelines will irreparably damage its cultural, ecological and hydrological values.

- It will bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

- This gasfield will add nearly 1 million tonnes every year to Australia's greenhouse gas emissions when our task is to reduce emissions by more than 7 million tonnes a year.

- And it won't even bring down gas or electricity prices for Aussies!

So why the hell is this going ahead? It wrecks of corruption. Stop selling out our future to get a few \$\$ for your political gains.

Yours sincerely,

Subject: Submission: 1 object to the Santos Narrabri gas project
Date: Wednesday, 5 August 2020 3:31:56 PM

Dear Commissioners,

I love rural New South Wales. I was born in Tamworth NSW in 1968 and having lived in rural NSW for most of my life understand our rich agricultural regions that suffer dreadful droughts and water shortages. I understand the importance of water to our rural communities. This proposal will directly and adversely impact the Great Artesian Basin.

This is YOUR chance to stop this foolishness. I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

The Pilliga is uniquely important for Gomeroi people, for biodiversity and water resources.

Industrialising it with 850 coal seam gas wells and countless roads, power lines and pipelines will irreparably damage its cultural, ecological and hydrological values.

It will bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

This gasfield will add nearly 1 million tonnes every year to Australia's greenhouse gas emissions when our task is to reduce emissions by more than 7 million tonnes a year.

And it won't even bring down gas or electricity prices for Aussies! The notion that it will employ many people is a lie. The Liberal and Nationals will deliver taxpayer subsidies to Santos which will be returned corruptly in donations to those parties.

This is such a risky but short-term project with the damage to the environment to last a millennium and beyond.

The disappointing feature of this project by the proponents and the Liberal National Government MP's and local government councillors who support their gas donor is that they won't be around this region in the years ahead to account for this recklessness.

They are enjoying the fruits of their betrayal to the rural communities now with board appointments and quangos but won't bear any of the responsibility for this grave mistake.

Even the head of NSW Planning Mr Kitto's grasp of the issues is woefully poor. Furthermore NSW does not suffer a shortage of affordable gas.

I implore you to reject this project for the reasons outlined above.

Yours sincerely,
Mark Rodda
New South Wales, 2340, Australia

Date: Wednesday, 5 August 2020 3:55:17 PM

Dear Commissioners,

I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest.

- The Pilliga is uniquely important for Gomeroi people, for biodiversity and water resources.

- Industrialising it with 850 coal seam gas wells and countless roads, power lines and pipelines will irreparably damage its cultural, ecological and hydrological values.

- It will bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

Much of NSW's food is grown in the Pilliga area and with a growing population we cannot risk any soil or water contamination from this gasfield, not to mention the struggle for farmers who already have been badly effected by drought.

- This gasfield will add nearly 1 million tonnes every year to Australia's greenhouse gas emissions when our task is to reduce emissions by more than 7 million tonnes a year.

- And it won't even bring down gas or electricity prices for Aussies!

Yours sincerely,

Julie Bennett

Subject: Submission: The Narrabri gas project is wrong for many reasons.
Date: Wednesday, 5 August 2020 3:35:49 PM

Dear Commissioners,

As an ex resident of the Pilliga Rd and past teacher at Coonamlnle High School I urge you to reject Santos' proposed Narrabri gasfield in the Pilliga forest. I have been to Narrabri recently and seen the devastation that can be caused by exploratory wells. It will be disastrous if allowed to proceed.

These are the reasons:

- The Pilliga is uniquely important for Gomeroi people, for biodiversity and water resources.

- Industrialising it with 850 coal seam gas wells and countless roads, power lines and pipelines will irreparably damage its cultural, ecological and hydrological values.

- It will bring up 1.5GL of water and more than 13,000 tonnes of toxic salts every year, risking the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers.

- This gasfield will add nearly 1 million tonnes every year to Australia's greenhouse gas emissions when our task is to reduce emissions by more than 7 million tonnes a year.

- And it won't bring down gas or electricity prices domestically.

Yours sincerely,

Robert Doyle

Dear Commissioners,

Please reject Santos' proposed Narrabri gasfield in the Pilliga forest. This wonderful forest is uniquely important for Gomeri people, for biodiversity and water resources.

Turning it into an industrial site with 850 coal seam gas wells and countless roads, power lines and pipelines will irreparably damage its cultural, ecological and hydrological values.

Santos' greed would put at risk the Great Artesian Basin Southern Recharge, the Gunnedah Oxley Basin and local aquifers, and add nearly 1 million tonnes every year to Australia's greenhouse gas emissions. As responsible citizens of our shared and only world we should instead aim to reduce emissions by more than 7 million tonnes a year.

Yours sincerely,

Pauline Sedgwick

Mosman, New South Wales, 2088, Australia
