## OBJECTION Dunmore Lakes Modification 2 Minamurra Lake

I am opposed to the Modifications 2 of the project as the negative impacts on environment and cultural heritage far outweigh the benefits.

The proposal will remove important habitat and hollow bearing trees, impact the westward migration of mangroves as sea levels rise

The project will remove a site of cultural significance to both Aboriginal and Colonial history - the place where a massacre took place

I also fail to understand how the project was classified State Significant in the first place given the negative impact it has on the local Aboriginal people as well as a pristine river system

Kind Regards
