Subject: Boral's Sandmining along the Minnamurra River.
Date: Saturday, 17 October 2020 9:37:35 AM

To whom it may concern,

This issue has been going on for a number of years. Each time the project is put forward for approval it is met with strong objections from the local community.

How many times do the Local Government bodies, Kiama Municipal Council and the Shellharbour City Council, together with the Illawarra Aboriginal Council, Local State Government Representatives and the Local Community have to voice their **STRONG** objection to this proposal.

Do the opinions of the local people mean nothing when it comes to the objections being raised or will big business once again get the ear of a Government Agency that has no concept of the issues on the ground locally.

Is this just another one of these projects that keep getting put forward until Boral finally gets its way?

We would **STRONGLY** ask the NSW Department of Planning Industry and Environment to reject this proposal in its entirety once and for all.

Yours Sincerely,

Mr. and Mrs. J. Rowe.
