Dear Matthew,

Commissioners O’Kane and Hann have asked me to follow up with the Department on the question posed on Day 2 of the public hearing regarding greenhouse gas emissions from the Maxwell Underground Coal Mine Project (page P-95 to P-96 on the transcript). In summary, at the public hearing the Commissioners asked the Department for clarification about a comparison put to the Commission that the scope 1 emissions in this Project are significantly more than other similar projects. The Department responded by noting aspects such as different coal seams, equipment and mining methods will generate different emissions. Can you please advise whether the Department would like to provide anything further to this response for the Commission’s consideration?

Kind regards,

Casey Joshua | Principal Case Manager
