Subject: SIMEC MINING PROPOSAL BARGO
To: <[REDACTED]>

I feel that the proposed mining should not be allowed or at the very least drastically reduced.

Whilst the latest changes reduces the impact on local homes and buildings they do not adequately protect the surrounding natural environment, particularly the watercourses including Hornes Creek.

Our local waterways eg. Thirlmere Lakes and The Potholes area have already been severely impacted. No one here believes that these have dried out purely from the drought. With the amount of torrential rain we have had and a wet summer water levels at the Lakes and elsewhere should be higher.

Lets protect what we have left !

Regards
Lyn Eberhart
