---

As a resident of the Southern Highlands I would like to raise my objections to the proposed Tahmoor South Coal Project.

Living In a country where the initial signs of climate change are becoming more evident every day, to be mining more coal that will produce more GHG is insane.

It is obvious that coal mines will become stranded assets as the world continues its move away from coal. Youngsters who will be attracted to work in the mine will find themselves unemployed in a decade with no skills that can be used in a renewable technology world. We should be putting more money into education in the new technology skills.
