Subject: Walla Walla Solar Farm (SSD 9874)
Date: Monday, 9 November 2020 10:00:43 PM

I have looked at this project in detail, and have concluded that it must proceed. The land is not prime farming soil. best suited to running sheep, preferably under solar panels. The so called glare is a misnomer as they are used to power airports!!. The site is well shielded from the wedding reception venue almost 2k away. Greater Hume Shire has more than its' fair share of climate change deniers!!. NSW has said it wants to become a superpower in renewable energy this is a chance to prove it. As a retired farmer i see this as the most productive use for this land. yours sincerly GREG VONTHIEN
