Date: Monday, 10 May 2021 5:30:29 PM

Hello Casey,

Hanson sent a letter to the IPC dated 5 May 2021 regarding minor amendments to the proposed locations of certain structures to allow for more simpler construction methods. These changes were discussed during the meeting with the IPC on 7 May 2021, during which the IPC indicated that they would not consider approving changes to the location, heights, or scale of any structures of the plans annexed to the recommended conditions of the SSD 8544 approval without further assessment by DPIE on the impacts associated with these proposed amendments.

In light of this Hanson wishes to advise the IPC that we now withdraw the request and will continue to seek approval of the plans as recommended by DPIE for approval.

Regards,

Andrew Driver
