Importance: High

Dear Anthony,

Thank you for providing the Department's response to the Commission's suggested condition amendments for the Glebe Island Concrete Batching Plant and Aggregate Handling Facility. Further to the Department's response, the Commission's understanding of the scope of the key elements of the Application assessed by the Department is:

1. A maximum of 1 million tonnes of aggregate primarily delivered to the site by ship, any aggregate delivered to the site by truck is to be used in the concrete batching plant;
2. In the event that ship deliveries are delayed or not possible, the cap of 182 truck movements per day will sufficiently limit truck deliveries of aggregate to the site;
3. The maximum of 241 aggregate deliveries per day is for aggregate that has arrived to the site by ship and is being delivered to an offsite location (i.e. "dispatch" as referenced in Table 2 of the Department's Assessment Report);

Can you please urgently confirm that:

- a. Points 1 to 3 accurately represent the scope of those key elements of the Application, and
- b. The Department has assessed the Application on this basis.

Many thanks,

Casey Joshua | Principal Case Manager
