Subject: Proposed Development of Glebe Island
Date: Monday, 10 May 2021 9:49:28 AM

Dear Sir/ Madam,

I am a very concerned Pymont resident. I write in protest over the Hanson concrete development on glebe Island. Pymont is a relatively small area ,but it is the most populated suburb in all of Australia. The far reaching and negative affects of this plant will effect many thousands of residents. The noise ,the traffic, the dust and the artificial light amongst other things, will be horrendous and will last day and night without letup . This will only increase as their productivity increases adversely affecting Pymont residents even more. The inner city suburb of Pymont is not a suitable area for such a heavy industry. This proposal should it go ahead only serves in the interests of Hanson and Hanson alone. I ,along with many thousands of Pymont protest and hope that this self serving proposal by Hanson does not go ahead.

Please re-consider ! Thankyou for your time.

Regards,

D. Velissariou,
