---

We strongly and vehemently oppose the proposal to relocate Hymix Concrete making facility to Glebe Island. After working hard for over four decades as country doctors we settled in Jacksons Landing as it was a quiet and serene sanctuary in inner west. No sensible town planner would come up with a ridiculous plan like this, to build a humongous concrete making facility smackbang in the middle of a densely populated residential part of the harbour foreshore..We would continue to protest in the strongest terms against this insane plan. An acoustic engineer I consulted said that the noise pollution would be excessive, not to mention about the dust and aerosol pollution. Drop this plan bury it now very disheartened and frusrtated citizens.

Dr. G.N & L Sukumar
