To whom it may concern,

I do not want my name published.

I support the new option presented by the IPC, but I object to the alternative proposal put forward by Mirvac.

My concerns were that the building envelope is too high next to the Pymont Bridge which is a heritage item, and the IPC option fixes that. I also support that the Northern Podium to be developed into a 1 level park that will be family friendly for those who use prams or require disabled access. It is a public amenity and that means it should be built in a way that is user friendly. A multi tier park is in no way user friendly because it adds obstacles and trip hazards in the form of stairs.

The Mirvac option still has a park spread over three different levels and has clearly done nothing to address the key issues of how to make a park that is a genuinely valuable public amenity that is designed with its users in mind.

Regards,
