Submission re:
Appendix 8 - Parking

This does not address the significant lines of traffic in both directions during drop off and pickup, particularly in adverse weather. This clogs up local streets in all directions and impacts residents.

Also it does not address the dangerous driving, illegal u-turns and speeding by parents and older students during peak times.

Also, many, many students park on local streets impacting local parking and amenity.

How will this be addressed?

Thanks,

Caroline Walsh
