Dear Commissioners

Re: Weigall

I have submitted my objections online. Additional to the online content please accept the attached two videos intended to convey (a) the noise spill from a small little machine used to clean the tennis courts. How much more so with blasting and construction (b) the size of the small machine to be compared with the noise the 2 years of construction equipment will create, and (c) the heights of the eaves at 29 Lawson st, showing the loss of sky that will be produced by the structure as referred in my online submission.

The videos were taken with my iphone xs approx 10 days ago. From my bedroom and our precinct communal garden.

I am here confirming my invitation to you to visit my home asap so that you may see, feel, hear for yourselves. I will make myself available at your convenience and try to organise with one or two neighbours for you also to visit their homes.

Sincerely

Devorah Wainer
