To Independent Planning Commission NSW

Dear Commissioners Mr Duncan and Mr Mackay

This is my first email to you about this subject , but not the first to other people involved in the project, that I never received feedback of any kind.

My concern mostly it is about the noise and wild life that will be affected. My bedroom window faced directly to the tennis courts ,10mt? just above the fence.

I'm worry about the first stage of the construction ,I do know that my place will shake up and down , as it did happen before when with the building across the road was done.

This time the machinery will be right under me, I'm already thinking a way to leave for that first period, if possible, for my mental health mostly.

We already have some damage done to the outside of the building ,with the construction at the corner

It is impossible to minimize the noise ,no matter how many buffers they place.

But the vibration it is another story and it is scary, the building does move and "jumps"

Unfortunately, I don't have any more a video , I made to show you when the excavation was on and my cup of tea moves around the desk ,it did remind my old country ,and it was natural, not a building construction

The other issue that worries me a lot, it is the fact this company will cut old trees ,I do hope they won't touch any bit of the tress right on the fence on our side ,because they do provide shade , shelter for many wild life (I can count many types of birds, plus some flying foxes and possums) and beauty too.

I do hope this email counts for something

Thank you

Carolina Kruspe-Olea
