

Attention : Commissioners

I live at 29 Lawson St backing onto the SGS construction site with my back window within a few metres of the proposed construction.

I share a small two bedroom flat with my two grandchildren, my teenage granddaughter, and my young grandson who attends Glenmore Rd Public School. My grandaughetr has asth,ma and will be severely impacted by dust and pollution from the site so close.

My grandson has the back bedroom with the outlook onto the site: he sleeps, does his homework, and has his recreations there .

He will be severely impacted by the loss of fresh air, light, sunlight , warmth in winter, cooling breezes in summer, healthy open vista & outlook : as well as by the terrible close loud noise of construction right outside his window.

We were forced to move from Millers Point when the LAHC sold the homes there , and we chose to move here because it was light airy & quiet

As a schoolboy, and one from an ethnic migrant background, he deserves equitable consideration to the SGS boys. They are going to have this palace of a sport centre which is going to have severe negative impact on the residents here including several children.

Section 6:3:13 of the the Department's Assessment Report requested that "the Applicant provide detailed view impact assessment for all surrounding properties likely to be impacted.".

My apartment has not been assessed - neither have any of the neighbours in the apartments at the back of our building, all within the minimum distance of the back of the proposed Sport Centre.

Properties likely to be impacted and which you need to assess are Flats 31, 28,27,24,23,21 and 20 of Building 29 Lawson St . And all of Building 31.

All aspects of my "View" including light , sunshine, warmth in winter , fresh air, harbour breezes in summer will be drastically impacted. Our open green vista will be reduced to the back of a block.

Please consider my young grandson, granddaughter as well as the other children living in these buildings, and out this buidling on another area of the fields away from housing..
