Subject: Submission against the Narrabri Underground Mine Stage 3 Extension Project
Date: Monday, 21 February 2022 6:43:26 PM

Dear Sir/Madam...

The present Government and Labour have approved the opening of many gas, oil, frack gassing, areas in the north of Australia as well as the disastrous Adani Mine. All these projects need to be stopped. In particular, The Narrabi Underground Mine Stage 3 Extension Project. The Arctic Ice pack that used to be hundreds of years old is now about 75% GONE in thickness and diameter. The majority of the ice up there is no older than 2 years. Arctic warming, methane emissions from Permafrost and the ocean floor from a rapidly warming Arctic, is adding heavily to The Green House Effect. It hit 100F record temperature in The Arctic Circle recently, a record...! It RAINED in Greenland for the first time in recorded history....! These are recent observations from NASA and NOAA and many Climate Change experts. If the ice up there goes and we have an open water event with no re freezing of the ice, the air conditioner of the earth will be DEAD and the regulation of the air and water temperatures and the currents governing them will also be DEAD. This will lead to rapid and climate change extinction level event over the entire earth. So, you see the urgency in getting rid of all coal, gas, frack gas and oil use VERY RAPIDLY...! Liberal and Labour have closed their eyes to this..! They give a time span of 2050. This event up north will happen before 2030....! So, you see the urgency in this matter. Please do not authorise The Narrabi Underground Mine extension and please inform all those responsible for the other mines to close

them IMMEDIATELY and stop all exports of coal and gas. The urgency is VERY GREAT on this matter as outlined above. The truth of this can be gleaned from the online reports freely available for all to see.
