Subject: Submission against the Narrabri Underground Mine Stage 3 Extension Project
Date: Monday, 21 February 2022 4:56:29 PM

Dear Independent Planning Commission

I am aware that the Commission has made some good decisions in relation to coal expansions in recent times. Congratulations!

I am writing now to oppose the Narrabri Underground Coal Mine expansion.

Your actions will be scrutinised by future generations. This is your chance to prove you cared. You may not reap any rewards but you will be a hero. Think of it as planting a tree so others can appreciate the shade beneath it in years to come.

Also this

- Expanding coal mines is incompatible with a safe climate.
- We will not meet our international climate commitments if we keep expanding coal mines or opening new ones.
- The project will release 34 million tonnes of greenhouse gasses locally and a 456 million tonnes when the coal is burnt overseas.
- If the expansion is approved, this mine will become the second most polluting mine in NSW for direct greenhouse emissions.
- Approving this proposal is inconsistent with NSW Government emission reduction targets for 2030 and 2050.
- The methane emissions from this mine will have an unacceptable impact on the climate for many decades.
- This mine expansion will harm productive farmland and damage significant areas of the Pilliga forest, which is home to many threatened species.
- The Pilliga is Gomeri Country. Damage from the mine will directly affect cultural values, including potential cracking a well-preserved grinding grove site.
- Local farmers will lose precious groundwater to the mine, with at least nine farm bores affected. Water will be less available to the Pilliga region.
- It adjoins the Narrabri coal seam gas project and will lead to massive cumulative impacts if both proceed.

We can't just keep letting this happen. Don't be scared.

Yours in desperation
Shanley Gregory
