**Subject:** Submission against the Narrabri Underground Mine Stage 3 Extension Project  
**Date:** Tuesday, 22 February 2022 8:47:25 AM

---

The following are the obvious reasons for not approving this project.

- Expanding coal mines is incompatible with a safe climate.
- We will not meet our international climate commitments if we keep expanding coal mines or opening new ones.
- The project will release 34 million tonnes of greenhouse gasses locally and a 456 million tonnes when the coal is burnt overseas.
- If the expansion is approved, this mine will become the second most polluting mine in NSW for direct greenhouse emissions.
- Approving this proposal is inconsistent with NSW Government emission reduction targets for 2030 and 2050.
- The methane emissions from this mine will have an unacceptable impact on the climate for many decades.
- This mine expansion will harm productive farmland and damage significant areas of the Pilliga forest, which is home to many threatened species.
- The Pilliga is Gomerioi Country. Damage from the mine will directly affect cultural values, including potential cracking a well-preserved grinding grove site.
- Local farmers will lose precious groundwater to the mine, with at least nine farm bores affected. Water will be less available to the Pilliga region.
- It adjoins the Narrabri coal seam gas project and will lead to massive cumulative impacts if both proceed.

Dr. F. S. Fisher  
Senior Honorary Research Fellow, Federation University

\*\*\*\*\*

Instead of trying to sustain the way we live,  
it's time to ask how to create a sustainable way of living.

\*\*\*\*\*

"What other reason could there be for getting up in the morning  
except to set ourselves free." (after Ann McMaster '95)
