

Submission on Glendell Continued Operations SSD 9349 and SSD 5850 Mod 4 - Additional Material DPE to IPC Response to heritage assessment

Thank you for the opportunity to submit an objection to the Glendell Continued Operations SSD 9349 and SSD 5850 Mod 4 - Additional Material DPE to IPC Response to heritage assessment.

Notwithstanding the dire impacts of GHG emissions from this mine, do the social and economic benefits really outweigh the significant amenity and heritage impacts of this proposal? I say no because...

There are no social benefits and the promised economic benefits, including jobs are unlikely to be realised when this mine will probably close before it becomes profitable.

In the meantime, a unique homestead of exceptional heritage significance will be lost forever because **where** it is, is as important as **what** it is and there is no going back.

A proposal which offers benefits which may never be realised and causes sustained and irreversible impacts is certainly **not** in the public interest.

Please reject this proposal.
