Planning Assessment Commission Hearing into  
The Mount Pleasant Optimisation Project,  
SSD 10418,  
Day 1, 7 July 2022

Question on Notice

Professor Fell: Dr Nugent. In your opinion, are the national environmental protection measures standards for PM 10 and PM 2.5 appropriate for an equine environment?

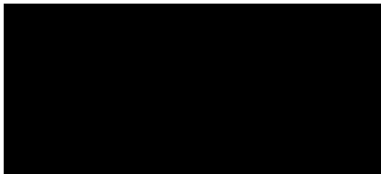

Answer

No they are not.

I have seen and concur with the advice provided by Dr Brett Tennent-Brown, to the Hunter Thoroughbred Breeders Association (HTBA) on this matter.

Yours sincerely

Dr Sam Nugent
