

## **Martins Creek Quarry (SSD-6612) Submissions on Additional Material**

Even though I lodged a submission with you previously I wanted to ensure that you understand that the changes that have been proposed by Daracon in no way address the concerns that I raised:

- Being able to safely access the services and facilities in my village – either on foot (as I live nearby) or using my vehicle to park to collect bulky or heavy items
- Travelling safely on my local road network without damage caused to my vehicle through potholes and loose gravel
- The loss of the special ambience of Paterson that makes it the place I want to continue to call home
- Making changes to our village road system to suit Daracon's purposes that would take away easy access to my street and push traffic into Tucker Park which should only be used for recreation for locals and visitors alike
- The visitors that are attracted to spend time in Paterson are present right through the week, not just on weekends. Our local businesses' trading shouldn't be affected by truck-dominated streets and limited parking.

Please understand the importance of the decision you make regarding Martins Creek Quarry and the potential for such a negative impact on so many lives.
