Dear IPC members

After reading through the new material provided in relation to the planned Martins Creek Quarry Expansion I am still in complete opposition to the expansion. The revisions have only included minor changes and do not resolve any of my concerns I communicated in my submission from November 2022.

Despite this ongoing process I still continue to believe this planned expansion will detrimentally impact the idyllic township of Paterson and the surrounding areas (especially the haulage route). I am therefore still in strong opposition to this expansion and am very much concerned for the future of Paterson should this be approved for development.

Warm regards,

Katelin McFarlane
