Subject: Martins creek Quarry

As a resident of martins creek for over 30 years I've lived with the quarry when it was a quarry .Now it's a mine you only have to google earth to see what Daracon has done .I've read what they have come up with and it doesn't matter what they say 50 trucks on these roads are Dangerous to the lives of the residents .I strongly hope the decision is in the interest of lives of the families who are travelling on these roads as there will be a death !!!Not to mention the people drinking out of tanks from roofs .As my family is .
