

My family don't approve of this location for the Regis mine. We are part of the Kings Plains community and have been under horrible stress for years over this proposal. People keep asking and not believing how can they build a gold mine so close to us. It's a totally unacceptable location.

Talking with our friends and family we figure if it goes ahead we could tolerate the increase in noise level and probably get used to the blasting however annoying. But the uncertainty of the possibly changes in our air and water quality has us frightened! We have all seen photos of the dust clouds above the country surrounding Cadia! This development simply can't be suitable for King's Plains.
