

Janine Cross opposed to the Regis Resources mine

With so many people living within close proximity to the proposed Regis site surely it renders it unsuitable for this style of mining and processing.

If this development is approved it will be devastating for the community of Kings Plains. There are about 85 households within 2 kms of the proposed mine site.

If approved these households are surely at risk, even if Regis Resources adhere to "best mining practices".

I understand there are to be no implications for failure to meet their noise, blasting and air quality limits.

Unbelievable!!! This mine cannot be approved so close to so many once happy country people.
