

## Submission against McPhillamy Gold Project

Imagine going for a long biopsy and being forced to wait to find out if you had cancer and your life was ruined.

That's how hundreds of people surrounding the McPhillamy's project must feel. They are full of hope but also fear for their futures.

They fear that they will be unable to live safely beside a gold mine. There has been conflicting information supplied by Regis, with much secrecy over the reasoning behind buybacks. Most families living close to the site boundary have been told they won't be affected. The community has lost all confidence in Regis Resources. If they manage a gold mine and processing facility the way they have managed its planning stages the community of Kings Plains is doomed!
