

If you are planning to operate an open cut mine and processing facility so close to so many residents surely you must accept responsibility for their health and well-being. Every other approval from DPE carries recommendations that ensure residents are protected in the event the project can't operate within their limitations.

I don't think this location is at all suitable for this development, but surely there must be strict conditions and penalties imposed on the operation to ensure the health of the people and the environment in the future.

Karley Griffiths- local Bathurst resident
