

Lewis Church submission against the McPhillamy gold project

As a family living within 2km of the Regis proposal we have had no consultation with Regis as to how our lifestyles will be affected. We have had nothing explained to us regarding how the mines construction and subsequent operation will impact our lives.

Regis have informed us of aspects of their progress and important "dates of changes to their operations. However nothing about our futures! We have been living with this anxiety for 10 years now. I don't know how our family will survive if this development is approved.
