

I am dumbfounded by the attitude of Bathurst and Blayney councils in their obvious acceptance of all the information and promises supplied by Regis.

As a near neighbor to the proposed site (222 Pounds Lane, Fitzgeralds Mount), and simply as a resident of Blayney shire I am unaware of any effort by the council to consult with us in regard to our fears and concerns over any aspects of their proposal.

We feel totally isolated, yes we are going to have a gold mine next to us and it will be great for Blayney, don't worry about the impact on your health or the environment.

Council has been very weak in agreeing and accepting blindly all features of their proposal. They have submitted completely to Regis' requests. I note the initial contribution by Regis to Blayney council is 1,000,000 with increments of \$212,222 to follow.

Shame! The Kings Plains community will cease to exist in the DPE's consent is granted.
