

Submission re McPhillamy Mine- Strongly opposed

How can the community ever be compensated for the impact the Regis proposal has had on them to date?

The continued stress and anxiety forced upon 87 households within 2kms of the actual site in particular!

Even if Regis is able to implement “best mining practices” the impact on the community will be significant. If this development is approved in the DPE’s development contract the quality of life for those people at King’s Plains will continue to deteriorate. How dare they say there will be little if any effect by the operation of the mine.

The mayor of Bathurst Robert Taylor has stated “it’s a good development for Bathurst despite the risks”
