

Submission re McPhillamy Mine- Strongly opposed

If the proposal goes ahead the near neighbours to the McPhillamy mine proposal will have their lifestyles changed forever.

Because there are so many families living within a 2km radius of the site the Kings Plains community will continue to disintegrate.

The stress of the impending development has seen the social structure slowly crumble. Some families have submitted to the pressure applied by Regis, unable to battle the uncertainty any longer. There has been marriage breakdowns, and much family turmoil. Obviously it's been difficult for people to decide whether they should or must leave their family farms, for most the land they were born on.

This site is unsuitable for this proposal.
