Subject: BOWDENS SILVER PROJECT

Dear all at IPCN,

this email is in support of the Bowdens Silver Project approval of which is thought by Silver Mines Limited. I am a shareholder in the company.

In my humble opinion development of this project will be in line with future technologies and materials needing more metal silver for their use.

Technologies in telecommunication, space science, whole range of computer using applications and most importantly in renewable, solar and wind, energy technologies will ever need more silver.

Having more own silver in Australia, we will not need to bring it from outside, be more independent and can offer supplies to others. That will bring additional wealth and economical security to the country.

Plenty of other benefits are, I believe, presented to You by SVL company and other shareholders.

I fully support development of this project and trust it will find Your approval.

Sincerely,

Adam Kosminski

Athelstone, SA 5076
