Submission

As a concerned Mudgee resident my main objection to Bowdens Lead Mine at Lee is its major threat to water safety and security. If you live anywhere near the mine site or anywhere along Lawson Creek there is an obvious and real risk that water use will be severely depleted.

Pollution of the water course is inevitable as a result of acid drainage waste from excavated rock from the mine, not to mention lead carried for many kilometres in dust particles. Households and irrigators along the Lawson Creek and Cudjegong River downstream of Mudgee have a great deal to lose — not to mention Mudgee residents and tourists alike!

There appear to be numerous shortcuts being taken by Bowdens, especially in relation to appropriate technology (or lack thereof) to overcome foreseeable problems as noted by expert studies undertaken by LAG (at considerable cost). This is unacceptable!!
