Some of the issues you may want to address in your submission could include:

- the reasons you support or object to the proposed development
- your consideration of the issues addressed in the DPE Assessment Report
- any impacts on you personally
- Anything you would like to change about the proposed development to improve it or to reduce its impact on you (e.g. its hours of operations, its design, size)
- in your opinion, do the recommended conditions of consent adequately prevent, mitigate or offset any adverse impacts from the proposed development.

Submission

JAMES PERCY THOMPSON

I object to this mine as it is dangerous to the Communities of
Lue, Mudgee, Gulpyng & Beard, as acid mine drainage will damage
the river Lawson creek & underground water system.

Lawson Creek flows across "Glen Willow" sports fields where
people play every week, when the underground aquifers fill
up during wet seasons they spill over onto the sports fields
as well.

Dust from the proposed mine would have a huge effect
on the limited residents in close proximity of the mine, led in
their water tanks & breathing in the toxic dust will have
a drastic effect on their health.

Tailings dam will remain forever, contaminating the water
forever.

There is no safe level of lead for children.

Reduced water supply, one or two years of drought
every ten years, there will be no water for residents
& farmers.

J. P. Thompson
