Yes

No

Re: Postal Public Submission in relation to Bowdens Silver Project (SSD 5765)

Support (I am making a submission that supports the conditional approval of this proposed development)

Neutral (I am neutral about this proposed development and am providing comments for consideration)

Objection (I am making a submission that objects to this proposed development going ahead)

Submission:

I fully support the Bowdens Silver Project SSD 5765 and all its proposed developments. I believe that such projects are vital for the future of Australia in a period of global uncertainty. Having a critical supply of silver is a must moving forward for Australia. This project may have an impact on the environment but silver is and has been proven to be a vital metal for the EV market not to mention other critical metals that can be extracted. Silver supply is a vital metal that Australia must secure for itself and ensure that the move to electrical battery transport is fully supported. The environmental impact of climate change is not to be underestimated. Bowdens project will help combat long term climate change and provide valuable economic benefits for NSW/Australia.
