Some of the issues you may want to address in your submission could include:

- the reasons you support or object to the proposed development
- your consideration of the issues addressed in the DPE Assessment Report
- any impacts on you personally
- Anything you would like to change about the proposed development to improve it or to reduce its impact on you (e.g. its hours of operations, its design, size)
- in your opinion, do the recommended conditions of consent adequately prevent, mitigate or offset any adverse impacts from the proposed development.

Submission

I strongly object to this proposed development, for short term gain for the few.

Such destruction of this area ,where farming of cattle, fodder, wine etc is so important, is frightening. The pollution of the environment, risk to aquifers, water sources is unacceptable. Lead being mined near residential areas and schools , thus putting at risk the development of children - and probably animals - is an horrific idea.

As a regular visitor to the area I would be hesitant to partake of the foods and wines produced locally, fearful of the micro contamination.

With regards to the environment, it is a very unfriendly scenario. When the last mine at Ulan was developed I was horrified to see the destruction of the wildlife driven from their homes/rocky hills. I still recall the smell of death along the road where so very many of the wallabies - different types, probably some quite rare now - were killed. And that was just the obvious cost - there would have been many more creatures destroyed. In this time of appreciation of the need to preserve what is still left and maintain habitat this mine defies the popular and necessary trend.

With this in mind I submit that this mine NOT be permitted to proceed.
