Re: Postal Public Submission in relation to Bowdens Silver Project (SSD 5765)

Support (I am making a submission that supports the conditional approval of this proposed development)

Neutral (I am neutral about this proposed development and am providing comments for consideration)

Objection (I am making a submission that objects to this proposed development going ahead)

Submission:

I am very keen to see the Bowdens Silver Project develop into a producing mine. I believe this mine is desperately needed, both for the NSW economy but also because of the current demand for silver outstripping the supply. As both a monetary and industrial metal, silver will benefit from the move towards electrification of our world away from fossil fuels. The industrial applications of silver are increasing but exploration in recent years has been very low. It is predicted that there will be a silver deficit for many years to come and so the Bowdens Silver Project is likely to benefit from a rise in the price of silver, which is cheap relative to other resources when compared with historic values.
