Dear Sir/Madam,

As a long time shareholder of Silver Mines Ltd I wish to herein voice my support for the development of this mine, in doing so pointing out the following benefits to the local economy, the state of NSW, and humanity more broadly:

1. The proposed mine will provide employment opportunities in the local area, and therefore increased activity for local businesses where mine employees spend their wages.
2. The state of NSW will receive royalties from the silver, lead and zinc mined.
3. The silver produced will provide a local source of material vital to the future electrification of power and transport industries consistent with the overwhelming need to transition away from the use of fossil fuels.
4. Local sources of vital commodities are likely to become increasingly important for national security due to the worldwide retreat from globalisation and increases in polarisation and conflicts regarding trade and territory.

I therefore recommend full Government approval of the application by Silver Mines Ltd. to enable the Company to mine the Bowdens silver deposit.

Yours Sincerely,
Anthony Wright

Tony Wright
