Morning Casey

I hope my email finds you well.

Please find link below to the drone footage of the BSAL Application Area as discussed earlier this month. You will need to download the files in order to share them with the panel members. Alternatively I can share this folder, but will need email addresses for the panel members so that I can add these details to the file share folder.

 [Drone Footage for Gateway Panel](#)

There are three files in the folder:

- Mod 15 Drone footage BSAL Assessment Area.mp4
- Mod 15 Drone footage High Res (1 of 2).mp4
- Mod 15 Drone footage High Res (2 of 2).mp4

To assist with spatial orientation the road when viewing the footage is Panuara Road with the Cadia Valley Operations located on the left hand side. The Panuara Road alignment and its relationship to the Gateway Certification Application Area and BSAL Assessment Area is shown on the figures with in the Cadia Mod 15 Technical Overview of the Gateway Certificate Application.

The drone flight path is from the west to the east, generally along the southern boundary of the current mine lease as shown in the image below.

As always any questions let me know.

Regards

Rod
