Gabrielle Allan/Melanie Hollis
The Department of Planning and Environment
[REDACTED]

Dear Gabrielle/Melanie,

Airly Mine, State Significant Development (SSD-5581-MOD-5) – Modification to Increase Workforce and Rehab Reform

I refer to the abovementioned project and your request for advice on the Draft Conditions for the proposed modification to the Airly Mine's consent SSD 5581 to increase the full time equivalent employees from 155 to 190 and to amend conditions relating to rehabilitation management and performance conditions.

Council further notes that Centennial has provided a Submissions Report in response to Council's concerns relating to potential impacts the modification may have on the community/infrastructure in the area.

Council previously responded to the application dated 12 September 2023, recommending that given the increase in employees and potential greater impacts on community/public infrastructure in the area, that condition 15 relating to payment of the annual community contribution be increased.

That applicant has provided justification that the increase in employees is approximately 45.

As this is a minor increase, Council has no objection to the modification application.

Council requests that should any future modification be submitted with regard to Airly Mine, Springvale Mine or Angus Place, that Condition 15 be re-addressed.

Please do not hesitate to contact the undersigned between Monday to Friday on [REDACTED], [REDACTED], in Council's Economic Development and Environment should you have any queries in relation to this matter.

Yours sincerely,

[REDACTED]

Lauren Stevens
Development Planner
