---

We fully support the Bowmans Creek Windfarm.

This project will enhance businesses, community health and enviromental gains throughout the Hunter Valley.' NO POLLUTION FROM COAL MINES.' Plus the employment opportunities for the community will increase.

In our experience we have found that the Silent Majority are very much for and in full support of this project.

Having also visited and observed Wind farms in other areas, we have been able to gauge their great benefits for communities, .

This is a very positive project,that will help all. A must do project to commence and be in production as soon as possible.

Regards Jan Thompson.
