I am extremely opposed to this development going ahead in a prime agricultural and high biodiversity area.

The location has purely been chosen because of the proximity of the transmission lines and this makes it economical for the generator and Transgrid.

Kentucky is a diverse community with an eclectic range of businesses that will be significantly impacted by the development of this project. Income streams will be impacted with construction and movement of large traffic through this pristine area. The biodiversity and ecology will be changed forever.

The location of this project will impact small and large land holders throughout the whole community, biodiversity, endangered species and highly regarded agricultural land.

Regional NSW should not bare the brunt of over consumers in the City.
